OCPS Vision

To be the top producer of successful students in the nation

OCPS Mission

To lead our students to success with the support and involvement of families and the community
Superintendent’s Message

Everything we do is focused on nurturing the success of our students. And we understand that success can be defined in many ways. That is why we have created different academic paths that lead to the same end result – high student achievement.

Here’s a quick look at some of the programs offered through OCPS:

- Prestigious International Baccalaureate magnet programs at 10 middle and high schools.
- Dual-enrollment programs at all high schools that allow students to earn college credits at no additional cost.
- Magnet programs in elementary, middle and high schools that offer customized curriculum in specific areas of interest that include theater and performing arts, international studies, law and finance, science and technology, foreign languages, criminal justice, medical technology, veterinary science and many more.
- A full complement of Advanced Studies and Honors courses offered at our middle and high schools.
- Career and technical education programs that begin in middle school.
- Full offering of online and virtual courses.
- A wide variety of sports programs for male and female students.

OCPS Students are poised for success after completing their studies. Many of our students are accepted into top universities and colleges throughout the country.

I encourage you to visit your local schools, which can be located through our Find a School search. They can provide you with more insight into the many offerings that are available to your student.

For those of you who are part of a school community, whether as a parent, student or community volunteer, thank you for choosing Orange County Public Schools.

Sincerely,

Barbara M. Jenkins
Superintendent

Students Entering Grade Nine in the 2013-2014 School Year

What are the diploma options?

Students must successfully complete one of the following diploma options:
- 24-credit standard diploma
- 18-credit Academically Challenging Curriculum to Enhance Learning (ACCEL) option
- Advanced International Certificate of Education (AICE) curriculum
- International Baccalaureate (IB) Diploma curriculum

What are the state assessment requirements?

Students must pass the following statewide assessments:
- Grade 10 ELA (or ACT/SAT concordant score)
- Algebra I end-of-course (EOC) and the results constitute thirty percent of the final course grade* or a comparative score on the Postsecondary Education Readiness Test (P.E.R.T.)

Students must participate in the EOC assessments, and the results constitute 30 percent of the final course grade*. These assessments are in the following subjects:
- Geometry
- Biology I
- U.S. History
- Algebra II (if enrolled)

*Special Note: Thirty percent not applicable if not enrolled in the course but passed the EOC.

What is the credit acceleration program (CAP)?

This program allows a student to earn high school credit if the student passes an advanced placement (AP) examination, a College Level Examination Program (CLEP) or a statewide course assessment without enrollment in the course. The courses include the following subjects:
- Algebra I
- Geometry
- U.S. History

What are the graduation requirements for students with disabilities?

Two options are available only to students with disabilities. Both require the 24 credits listed in the table and both allow students to substitute a career and technical (CTE) course with related content for one credit in ELA IV, mathematics, science and social studies (excluding Algebra I, Geometry, Biology I and U.S. History).
- Students with significant cognitive disabilities may earn credits via access courses and be assessed via an alternate assessment.
- Students who choose the academic and employment option must earn at least .5 credit via paid employment.
- Certain students may earn a special diploma.

What are the requirements for the 24-credit standard diploma option?

<table>

Where is information on Bright Futures Scholarships located?

The Florida Bright Futures Scholarship Program rewards students for their academic achievements during high school by providing funding to attend a postsecondary institution in Florida. For more information, visit http://www.floridastudentfinancialaid.org/SSFAD/bf/.

What are the requirements for standard diploma designations?

Can a student who selects the 24-credit program graduate early?

Yes, a student who completes all the 24-credit program requirements for a standard diploma may graduate in fewer than eight semesters.

What is the distinction between the 18-credit ACCEL option and the 24-credit option?

- 3 elective credits instead of 8
- Physical education is not required
- Online course is not required

All other graduation requirements for a 24-credit standard diploma must be met (per s. 1003.4282(3)(a)-(e), F.S.).

Where is information on financial aid located?

The Office of Student Financial Assistance State Programs administers a variety of postsecondary educational state-funded grants and scholarships. To learn more, visit http://www.floridastudentfinancialaid.org/.

Revised April 2016
Students Entering Grade Nine in the 2014-2015 School Year

What are the diploma options?

Students Entering Grade Nine in the 2014-2015 School Year

Curriculum Guide 2017-2018

Revised April 2016
Students Entering Grade Nine in the 2015-2016 School Year

What are the diploma options?

Students must successfully complete one of the following diploma options:
- 24-credit standard diploma
- 18-credit Academically Challenging Curriculum to Enhance Learning (ACCEL) option
- Advanced International Certificate of Education (AICE) curriculum
- International Baccalaureate (IB) Diploma curriculum

What are the state assessment requirements?

Students must pass the following statewide assessments:
- Grade 10 ELA (or ACT/SAT concordant score)
- Algebra I end-of-course (EOC) and the results constitute thirty percent of the final course grade* or a comparative score on the Postsecondary Education Readiness Test (P.E.R.T.)

Students must participate in the EOC assessments, and the results constitute 30 percent of the final course grade*. These assessments are in the following subjects:
- Biology I
- U.S. History
- Geometry
- Algebra II (if enrolled)

*Special Note: Thirty percent not applicable if not enrolled in the course but passed the EOC.

What is the credit acceleration program (CAP)?

This program allows a student to earn high school credit if the student passes an advanced placement (AP) examination, a College Level Examination Program (CLEP) or a statewide course assessment without enrollment in the course. The courses include the following subjects:
- Algebra I
- Biology I
- Geometry
- Algebra II
- U.S. History

What are the graduation requirements for students with disabilities?

Two options are available only to students with disabilities. Both require the 24 credits listed in the table and both allow students to substitute a career and technical (CTE) course with related content for one credit in ELA IV, mathematics, science and social studies (excluding Algebra I, Geometry, Biology I and U.S. History).
- Students with significant cognitive disabilities may earn credits via access courses and be assessed via an alternate assessment.
- Students who choose the academic and employment option must earn at least .5 credit via paid employment.

Revised April 2016
Curriculum Guide 2017-2018

Students Entering Grade Nine in the 2016-2017 School Year

What are the diploma options?
Students must successfully complete one of the following diploma options:
- 24-credit standard diploma
- 18-credit Academically Challenging Curriculum to Enhance Learning (ACCEL) option
- Advanced International Certificate of Education (AICE) curriculum
- International Baccalaureate (IB) Diploma curriculum

What are the state assessment requirements?
Students must pass the following statewide assessments:
- Grade 10 ELA (or ACT/SAT concordant score)
- Algebra I end-of-course (EOC) and the results constitute thirty percent of the final course grade* or a comparative score on the Postsecondary Education Readiness Test (P.E.R.T.)

Students must participate in the EOC assessments, and the results constitute 30 percent of the final course grade*. These assessments are in the following subjects:
- Biology I  
- U.S. History
- Geometry
- Algebra II (if enrolled)

*Special Note: Thirty percent not applicable if not enrolled in the course but passed the EOC.

What is the credit acceleration program (CAP)?
This program allows a student to earn high school credit if the student passes an advanced placement (AP) examination, a College Level Examination Program (CLEP) or a statewide course assessment without enrollment in the course. The courses include the following subjects:
- Algebra I  
- Biology I
- Geometry
- Algebra II
- U.S. History

What are the graduation requirements for students with disabilities?
Two options are available only to students with disabilities. Both require the 24 credits listed in the table and both allow students to substitute a career and technical (CTE) course with related content for one credit in ELA IV, mathematics, science and social studies (excluding Algebra I, Geometry, Biology I and U.S. History).

- Students with significant cognitive disabilities may earn credits via access courses and be assessed via an alternate assessment.
- Students who choose the academic and employment option must earn at least .5 credit via paid employment.

What are the requirements for the 24-credit standard diploma option?

<table>
<thead>
<tr>
<th>4 Credits English Language Arts (ELA)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELA I, II, III, IV</td>
</tr>
<tr>
<td>ELA honors, AP, AICE, IB and dual enrollment courses may satisfy this requirement.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>4 Credits Mathematics</th>
</tr>
</thead>
<tbody>
<tr>
<td>One of which must be Algebra I and one of which must be Geometry.</td>
</tr>
<tr>
<td>Industry certifications that lead to college credit may substitute for up to two mathematics credits (except for Algebra I and Geometry).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>3 Credits Science</th>
</tr>

Students must earn a 2.0 grade point average on a 4.0 scale.

Revised April 2016
### Scholar Diploma Designation

<table>
<thead>
<tr>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earn 1 credit in Algebra II (must pass EOC);</td>
</tr>
<tr>
<td>Pass the Geometry EOC;</td>
</tr>
<tr>
<td>Earn 1 credit in statistics or an equally rigorous mathematics course;</td>
</tr>
<tr>
<td>Pass the Biology I EOC;</td>
</tr>
<tr>
<td>Earn 1 credit in chemistry or physics;</td>
</tr>
<tr>
<td>Earn 1 credit in a course equally rigorous to chemistry or physics;</td>
</tr>
<tr>
<td>Pass the U.S. History EOC;</td>
</tr>
<tr>
<td>Earn 2 credits in the same world language; and</td>
</tr>
<tr>
<td>Earn at least 1 credit in AP, IB, AICE or a dual enrollment course.</td>
</tr>
</tbody>
</table>

A student is exempt from the Biology I or U.S. History assessment if the student is enrolled in an AP, IB or AICE Biology I or U.S. History course and the student

- Takes the respective AP, IB or AICE assessment; and
- Earns the minimum score to earn college credit.

### Merit Diploma Designation

- Meet the standard high school diploma requirements
- Attain one or more industry certifications from the list established (per section 1003.492, Statutes [F.S.]).

### Can a student who selects the 24-credit program graduate early?

Yes, a student who completes all the 24-credit program requirements for a standard diploma may graduate in fewer than eight semesters.

### What is the distinction between the 18-credit ACCEL option and the 24-credit option?

- 3 elective credits instead of 8
- Physical Education is not required
- Online course is not required

All other graduation requirements for a 24-credit standard diploma must be met (per s. 1003.4282(3)(a)-(e), F.S.).

### Where is information on Bright Futures Scholarships located?

The Florida Bright Futures Scholarship Program rewards students for their academic achievements during high school by providing funding to attend a postsecondary institution in Florida. For more information, visit [http://www.floridastudentfinancialaid.org/SSFAD/bf/](http://www.floridastudentfinancialaid.org/SSFAD/bf/).

### What are the public postsecondary options?

#### State University System

Admission into Florida's public universities is competitive. Prospective students should complete a rigorous curriculum in high school and apply to more than one university to increase their chance for acceptance. To qualify to enter one of Florida's public universities, a first-time-in-college student must meet the following minimum requirements:

- High school graduation with a standard diploma
- Admission test scores
- 16 Credits of approved college preparatory academic courses
- 4 English (3 with substantial writing)
- 4 Mathematics (Algebra I level and above)
- 3 Natural Science (2 with substantial lab)
- 3 Social Science
- 2 World Language (sequential, in the same language)
- 2 Approved electives

[http://www.flbog.edu/forstudents/planning](http://www.flbog.edu/forstudents/planning)

#### The Florida College System

The 28 state colleges offer career-related certificates and two-year associate degrees that prepare students to transfer to a bachelor's degree program or to enter jobs requiring specific skills. Many also offer baccalaureate degrees in high-demand fields. Florida College System institutions have an open door policy. This means that students who have earned a standard high school diploma, have earned a high school equivalency diploma or have demonstrated success in postsecondary coursework will be admitted to an associate degree program.

#### Career and Technical Centers

Florida also offers students 48 accredited career and technical centers throughout the state, which provide the education and certification necessary to work in a particular career or technical field. Programs are flexible for students and provide industry-specific education and training for a wide variety of occupations.

[Career and Technical Directors](http://www.flbog.edu/forstudents/planning)

### Where is information on financial aid located?

The Office of Student Financial Assistance State Programs administers a variety of postsecondary educational state-funded grants and scholarships. To learn more, visit [http://www.floridastudentfinancialaid.org/](http://www.floridastudentfinancialaid.org/).

Revised April 2016
Students Entering Grade Nine in the 2017-2018 School Year

Graduation requirements from the Students Entering Grade Nine in the 2016-2017 School Year pages are current as of the Curriculum Guide publication date but are subject to legislative changes.

For more information, please visit fldoe.org/academics/graduation-requirements/
Graduation Requirements for Florida’s Statewide Assessments

Overview
According to Florida law, students must meet certain academic requirements to earn a standard high school diploma from a public school. This means that students must pass required courses, earn a minimum number of credits, earn a minimum grade point average and pass the required statewide assessments. Students who meet these requirements but do not pass the required assessments will receive a certificate of completion, which is not equivalent to a standard high school diploma. Passing scores for the statewide assessments are determined by the State Board of Education.

Graduation Requirements

Reading/English Language Arts (ELA) Assessment Requirement
The reading/ELA assessments students must pass to graduate with a standard high school diploma are determined by each student’s year of enrollment in grade 9. Table 1 lists the required reading/ELA assessments for each grade 9 cohort and the passing score for each assessment.

Grade 10 FCAT 2.0 Reading
Students who entered grade 9 in 2010-11 through 2012-13 are required to pass the Grade 10 FCAT 2.0 Reading assessment aligned to the Next Generation Sunshine State Standards (NGSSS). The State Board of Education established performance standards for FCAT 2.0 Reading on December 19, 2011. Students may satisfy this requirement by earning a concordant score (as described on the following page) or by earning the alternate passing score of 349 on the Florida Standards Assessments (FSA) ELA Retake. For more information on the FCAT 2.0 and NGSSS assessments, please see the NGSSS Statewide Science Assessment and FCAT 2.0 Reading Retake Fact Sheet.

FSA Grade 10 English Language Arts
In 2014-15, the Florida Standards Assessments, aligned to the Florida Standards, were introduced, and the Grade 10 FSA ELA assessment was administered for the first time in spring 2015. Passing status was determined by linking student performance on the 2015 Grade 10 FSA ELA test to student performance on the 2014 Grade 10 FCAT 2.0 Reading test, using a linked passing score of 245 on the Grade 10 FCAT 2.0 Reading test. These students, as well as students who took the Retake assessment in fall 2015, are eligible for an alternate passing score.

New performance standards were adopted in State Board of Education rule in January 2016. Beginning with students who entered grade 9 in 2014-15 and beyond, students must pass the Grade 10 FSA ELA by earning the score established in the State Board of Education rule, as indicated below. For more information on the FSA ELA, please see the FSA English Language Arts and Mathematics Fact Sheet.

<table>
<thead>
<tr>
<th>School Year When Assessment Requirements Began for Students Entering Grade 9</th>
<th>Assessment that Students Must Pass in Order to Graduate</th>
<th>Passing Score for the Required Assessment</th>
</tr>
</thead>
<tbody>

<td>Grade 10 FCAT 2.0 Reading</td>
<td>245</td>
</tr>
<tr>
<td>2013-14</td>
<td>Grade 10 FSA ELA</td>
<td>349*</td>
</tr>
<tr>
<td>2014-15 and beyond</td>
<td>Grade 10 FSA ELA</td>
<td>350</td>
</tr>
</tbody>
</table>

*Students who took the assessment prior to the adoption of the passing score on the new scale adopted by the State Board are eligible to use the alternate passing score for graduation, which is linked to the passing score for the previous assessment requirement.
Algebra 1 End-of-Course (EOC) Assessment Requirement

Beginning with students entering grade 9 in 2011-12 and beyond, students must take and pass the Algebra 1 EOC Assessment to satisfy this graduation requirement.

NGSSS Algebra 1 EOC Assessment

The State Board of Education established performance standards for the Algebra 1 EOC assessment aligned to the NGSSS on December 19, 2011. Only students who took an Algebra 1 course aligned to the NGSSS who need to achieve a passing score (399) will take the NGSSS Algebra 1 EOC Assessment Retake. For more information on the NGSSS Algebra 1 EOC, please see the NGSSS End-Of-Course Assessments Fact Sheet. Students whose graduation requirement is the NGSSS Algebra 1 EOC may also satisfy this requirement by earning the alternate passing score of 489 on the FSA Algebra 1 EOC assessment.

FSA Algebra 1 EOC Assessment

The FSA Algebra 1 EOC Assessment was first administered in spring 2015. Passing status was determined by linking student performance on the FSA Algebra 1 EOC to student performance on the NGSSS Algebra 1 EOC, using a linked passing score of 399 on the NGSSS Algebra 1 EOC Assessment. These students, as well as students who took the assessment in summer, fall, or winter 2015, are eligible for an alternate passing score of 489. Students taking the assessment for the first time after performance standards were set in January 2016 must pass the Algebra 1 EOC by earning the passing score of 497, adopted in State Board of Education rule in January 2016. For more information on the FSA Algebra 1 EOC, please see the FSA End-of-Course Assessments Fact Sheet.

Table 2: Algebra 1 EOC Assessment Requirement and Passing Score by Implementation Year

<table>
<thead>
<tr>
<th>Implementation Year</th>
<th>Assessment that Students Must Pass in Order to Graduate</th>
<th>Passing Score for the Required Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>2011-12*</td>
<td>NGSSS Algebra 1 EOC</td>
<td>399</td>
</tr>
<tr>
<td>2014-15</td>
<td>FSA Algebra 1 EOC Assessment</td>
<td>489**</td>
</tr>
<tr>
<td>2014-15 and beyond</td>
<td>FSA Algebra 1 EOC Assessment</td>
<td>497</td>
</tr>
</tbody>
</table>

*Students who entered Grade 9 in the 2010-11 school year were required to earn course credit in Algebra 1 or an equivalent course and participate in the Algebra 1 EOC Assessment. The results of the Algebra 1 EOC Assessment must constitute 30% of these students’ final course grades, but there is not a passing requirement for this cohort of students.

**Students who took the assessment prior to the adoption of the passing score on the new scale adopted by the State Board in January 2016 are eligible to use the alternate passing score for graduation, which is linked to the passing score for the previous assessment requirement.

Graduation Options

- Retaking the Statewide Assessments—Students can retake the Grade 10 Reading/ELA test or Algebra 1 EOC Assessment (NGSSS or FSA, as appropriate) each time the test is administered until they achieve a passing score, and students can continue their high school education beyond the twelfth-grade year should they need additional instruction. Students currently have up to five opportunities to pass the Grade 10 Reading/ELA test before their scheduled graduation. Students who do not pass the Grade 10 Reading/ELA in the spring of their tenth-grade year may retest in fall and spring of their eleventh- and twelfth-grade years. The number of opportunities to retake the Algebra 1 EOC Assessment will depend on the grade students are in when they first take the test, since it is taken at the conclusion of the course. The Algebra 1 EOC Assessment is currently administered four times each year: in the fall, winter, spring and summer.
• **Concordant and Comparative Scores Option**—A student can also meet assessment graduation requirements by receiving a score concordant to the FCAT 2.0 Reading passing score on either the ACT or SAT and a score comparative to the Algebra 1 EOC Assessment (NGSSS) passing score on the Postsecondary Education Readiness Test (PERT). FCAT 2.0 Reading concordant scores for students entering grade 9 in 2010-11 and after and the Algebra 1 EOC Assessment comparative score for students entering grade 9 in 2011-12 and after were established in rule by the State Board of Education in September 2013. **New concordant and comparative scores will be established for the new assessments once a sufficient number of students have participated in both the new assessment and the alternate assessment(s) to conduct the concordant/comparative score study. Until these new scores are established, the current scores may be used by all students.**

Table 3 shows the concordant and comparative scores students must achieve to satisfy graduation requirements. All students enrolled in grade 10 are required to participate in the Grade 10 FSA ELA assessment in accordance with section 1008.22, Florida Statutes (F.S.), regardless of whether they have a passing concordant score on file.

Additionally, if students have achieved a comparative score on the PERT prior to enrolling in and completing Algebra 1 or an equivalent course, they must take the Algebra 1 EOC Assessment in accordance with s. 1008.22, F.S.

</tr>
<tr>
<td>2014-2015 and beyond</td>
<td>X</td>
</tr>
</tbody>
</table>

* A student meets this requirement without passing the Biology 1 or U.S. History EOC Assessment if the student is enrolled in an Advanced Placement (AP), International Baccalaureate (IB), or Advanced International Certificate of Education (AICE) Biology 1 or U.S. History course and the student:  
  o Takes the respective AP, IB, or AICE assessment, and  
  o Earns the minimum score to earn college credit.

The passing score for each EOC assessment is the minimum score in Achievement Level 3 (see [http://www.fldoe.org/core/fileparse.php/3/urlt/achlevel.pdf](http://www.fldoe.org/core/fileparse.php/3/urlt/achlevel.pdf)). For students who took an EOC assessment during its implementation year, districts may opt to convert the reported T scores to the established score scale to determine the Achievement Level a student would have earned on the new scale, or a district may allow these students to retake the test to earn a passing score. Districts have received a formula that may be used to convert students’ T scores to the established scale scores. Additionally, districts may choose to administer an EOC assessment to students who did not have an opportunity to take it if they wish to qualify for the Scholar...
designations. Passing scores for FSA Geometry and Algebra 2 were adopted in State Board of Education rule in January 2016.

For students who took the FSA Geometry EOC (2014-15) prior to the adoption of passing scores, the alternate passing score is 492 and above, which corresponds to the passing score of 396 and above for the NGSSS Geometry EOC (2010-11), last administered December 2014.

- **Waivers for Students with Disabilities**—Students with disabilities who entered grade 9 in 2014-15 and succeeding years are required to work toward a standard high school diploma and are expected to participate in statewide, standardized assessments. (Students with disabilities who entered grade 9 in 2013-14 or earlier and are working toward a standard high school diploma are also expected to participate in statewide, standardized assessments.) Legislation, however, provides for a waiver of statewide, standardized assessment graduation requirements for students with disabilities whose abilities cannot be accurately measured by the assessments. Pursuant to s. 1008.22(3)(c)2., F.S., “A student with a disability, as defined in s. 1007.02(2), for whom the individual education plan (IEP) team determines that the statewide, standardized assessments under this section cannot accurately measure the student’s abilities, taking into consideration all allowable accommodations, shall have assessment results waived for the purpose of receiving a course grade and a standard high school diploma. Such waiver shall be designated on the student’s transcript.” For additional information, contact the Bureau of Exceptional Education and Student Services at http://www.fldoe.org/academics/exceptional-student-edu.

- **High School Equivalency Diploma Program (2014 GED® Test)**—The high school equivalency diploma program is designed to provide an opportunity for adults who have not graduated from high school to earn a State of Florida High School Diploma, the state’s equivalency diploma, by measuring the major academic skills and knowledge associated with a high school program of study, with increased emphasis on workplace and higher education. The state selected the 2014 GED® test as the assessment for the high school equivalency program during a competitive process conducted in 2014. The 2014 GED® Test includes four required content area tests: Reasoning through Language Arts, Mathematical Reasoning, Science, and Social Studies. It is a computer-based test. Passing the test may require some preparation. Local adult education programs sponsored by school districts, colleges and community organizations may assist students with determining how to best prepare for the test. Additional information and resources regarding the GED® Test and the high school equivalency program may be accessed at http://www.fldoe.org/academics/career-adult-edu/hse/.

**Previous Scores Required for Graduation**

**Students Originally Scheduled to Graduate between 2004 and 2013**—Students who entered grade 9 in the 2008-09 school year or prior and were originally scheduled to graduate between 2004 and 2013 must earn passing scores on Grade 10 FCAT Reading and Mathematics, or their equivalents. Students who entered grade 9 in the 2009-10 school year or prior must earn an alternate passing score (comparable to the passing score for Grade 10 FCAT Reading) on Grade 10 FCAT 2.0 Reading and a passing score on Grade 10 FCAT Mathematics. The FCAT Mathematics retake is no longer administered. Students who still need to satisfy this requirement must earn a concordant score on the SAT or ACT. **Students may also meet the FCAT Mathematics requirement by passing the NGSSS or FSA Algebra 1 EOC Assessment.** The required passing and concordant scores for students who entered grade 9 from 2001-01 to 2009-10 are provided in Table 5 (on the following page).

</tr>
</tbody>
</table>

*Students who participated in the spring 2011 Grade 10 FCAT 2.0 Reading test received scores called FCAT Equivalent Scores that were reported on the FCAT score scale, and the passing score was 1926 (scale score of 300). This is comparable to a score of 241 on the FCAT 2.0.

**A concordant score of 370 on SAT Mathematics was previously established in 2003 as an alternative for the Grade 10 FCAT Mathematics requirement. This alternative passing score was lowered to a score of 340 after a concordance study was conducted in November 2009 on a revised, more challenging version of the SAT. Students required to pass FCAT Mathematics for graduation may submit a score of 340 or higher regardless of their year of enrollment in grade 9 if the score is dated March 2005 and beyond.

Class of 2003—Students who were originally scheduled to graduate in 2003 may satisfy their graduation requirements by earning a Grade 10 FCAT 2.0 Reading score of 236 or higher.

High School Competency Test (HSCT) Requirement—The HSCT State Board Rule (6A-1.09421) was repealed in Fall 2015. Students who were scheduled to graduate in 2002 or earlier and have not passed the HSCT as part of their graduation requirements will need to enroll in an adult education program to earn a standard high school diploma. In accordance with Rule 6A-6.020, F.A.C., those who enter adult high school after their ninth grade cohort has graduated or who are not part of a ninth grade cohort must meet the current grade 12 cohort’s graduation requirements that are in effect the year they enter adult high school.
Helpful Resources

- Academic advisement flyers for students entering ninth grade and other information related to graduation requirements are available on the Graduation Requirements webpage.
- The FSA Portal, FSA Homepage, FCAT 2.0 Homepage, and Florida EOC Assessments Homepage provide information about the assessments currently administered and serve as valuable resources to students, parents/guardians, and educators. For previous assessments, please visit the Historical FCAT 2.0 Homepage and the FCAT Homepage.
- Schedules for FSA, FCAT 2.0, and EOC assessment administrations are accessible from the Florida Department of Education website.
- FloridaStudents.org provides student tutorials and resources for the Florida Standards.
- CPALMS.org is Florida’s official source for standards information and course descriptions and includes helpful resources for educators and students.
Acceleration and Academic Rigorous Programs

Students may utilize the acceleration and academically challenging programs listed below to pursue a more rigorous program of study or to accelerate entry into postsecondary institutions or career and technical education programs of their choice.

Middle School Option

Credits may be earned, with parental permission, in grades 6, 7, and/or 8, which may be applied toward the total credits needed for graduation, college admission, or Florida Bright Futures Scholarship Program requirements. During the time students are enrolled in designated senior high school courses, they are considered to be grade 9 students for those class periods. The courses will remain a part of the students’ middle school record and high school record. Factors to be considered in taking high school courses in the middle school include the impact on the student’s GPA and subsequent rank in class, the possible lack of recognition by the National Athletic Association (NCAA) for senior high school courses taken in a grade below grade 9, and the benefit of retaking a course in which all the skills have not been mastered.

Academically Challenging Curriculum to Enhance Learning (ACCEL)

ACCEL options are educational options that provide an academically challenging curriculum or accelerated instruction to eligible public school students in kindergarten through grade 12. At a minimum, each school must offer the following ACCEL options: whole grade and midyear promotion; subject matter acceleration; virtual instruction in higher grade level subjects; the Credit Acceleration Program under s. 1003.4295; and the 18 credit high school graduation option. Additional ACCEL options may include, but are not limited to, enriched science, technology, engineering, and mathematics coursework; enrichment programs; flexible grouping; advanced academic courses; combined classes; self paced instruction; rigorous industry certifications that are articulated to college credit and approved pursuant to ss. 1003.492 and 1008.44; work related internships or apprenticeships; curriculum compacting; advanced content instruction; and telescoping curriculum.

Academic Dual Enrollment

Dual enrollment is an articulated acceleration mechanism open to secondary students who are attending public high school. To enroll in dual enrollment academic courses, students must demonstrate a readiness to successfully complete college level course work and have attained a qualifying grade point average. In order to determine the high school equivalency and the high school credit awarded for postsecondary courses completed through dual enrollment, please refer to the most current Dual Enrollment Course – High School Subject Area Equivalency. The district must weigh college–level dual enrollment courses the same as Advanced Placement, International Baccalaureate, and Advanced International Certification of Education courses when grade point averages are calculated. All high schools must follow the Dual Enrollment master scheduling protocols in order to ensure the capturing of Dual Enrollment data for students participating in both on high school campus and off high school campus dual enrollment courses.

Early Admission

Early admission is a form of dual enrollment through which eligible grade 12 students may enroll in a college or university on a fulltime basis in courses that are creditable toward a high school diploma and the associate or baccalaureate degree. To be considered full time, a student must enroll in a minimum of 12 college credit hours, but may not be required to enroll in more than 15 college credit hours.
Career and Technical Education

Career and Technical Education courses prepare students for occupations important to Florida’s economic development. These programs are organized into career clusters and are geared toward middle school, high school, district technical school, and Florida College System students throughout the state. With the help of partners in education, business and industry, and trade associations, each program includes the academic and technical skills required to be successful in today’s economy.

Career and Technical courses are indicated by the Career and Technical Education symbol. Any career education course authorized for grades 13 or higher may be taken for credit by students in grades 9-12, based on the career objectives of the students. OCPS adheres to a policy of nondiscrimination in requirements for admission to and graduation from programs offered at post-secondary area technical centers operated by the district. The district will provide on a case-by-case basis, waivers, accommodations, and reasonable substitutions in meeting the admission and graduation requirements for students with disabilities at post-secondary area technical centers.

For more information, see “Career and Technical Education / College Connection” on page 31.

Advanced Placement (AP)

Advanced Placement (AP) is an acceleration opportunity administered by the College Board providing college level instruction in high school. Post-secondary credit for an AP course may be awarded to students who earn a minimum of a 3 on a 5 point scale on the corresponding AP exam. OCPS is dedicated to ensuring equitable access by giving all willing and academically prepared students the opportunity to participate in AP courses. Only through a commitment to equitable preparation and access can true equity and excellence be achieved.

For more information, visit apstudent.collegeboard.org

Advanced International Certificate of Education (AICE)

The Advanced International Certificate of Education (AICE) program is offered in several schools for which eligible high school students earn credit toward graduation and may receive post-secondary credit at colleges and universities.

For more information, visit cie.org.uk/programmes-and-qualifications/cambridge-advanced/cambridge-aice-diploma/

International Baccalaureate (IB)

The International Baccalaureate (IB) program is offered in several schools for which eligible high school students earn credit toward graduation and may receive post-secondary credit at colleges and universities.

For more information, visit ibo.org

Orange County Virtual School

Middle and senior high school students are eligible to enroll in the Orange County Virtual School (OCVS). The courses offered are teacher facilitated. Courses are based upon the same criteria as those taught in the standard high school program and, therefore, generate the same credit for students. Middle school students may earn credit only in those courses designated
as “acceleration” courses as indicated above. A complete list of courses is available through OCVS’s web site at ocvs.ocps.net. Courses completed through OCVS satisfy the Online Graduation Requirement.

For more information, see “Part-Time Enrollment with Orange County Virtual School” on page 24.

**Florida Virtual School**

Middle and senior high school students are eligible to enroll in the Florida Virtual School (FLVS). The courses offered are teacher facilitated and available throughout the state. Courses are based upon the same criteria as those taught in the standard high school program and, therefore, generate the same credit for students. Middle school students may earn credit only in those courses designated as “acceleration” courses as indicated above. A complete list of courses is available through FLVS’s web site at flvs.net. Courses completed through FLVS satisfy the Online Graduation Requirement.

**Credit by Examination**

Credit by examination is a method by which post secondary credit is earned based on the receipt of a specified minimum score on a nationally standardized general or subject area examination. These credits are not accepted by the NCAAA for athletic eligibility.

**Credit Acceleration Program (CAP)**

Students may earn credit for selected high school courses by taking the End of Course (EOC) assessment for the course and earning a score that indicates the student has attained a satisfactory score on a state EOC assessment. These credits are not accepted by the NCAAA for athletic eligibility.
Part-Time Enrollment with Orange County Virtual School

Public School Part-Time OCVS Students

Part-time students are enrolled in a traditional Orange County middle or high school full-time and may take supplemental courses online with OCVS. Students can take an online course for graduation acceleration, credit recovery, grade forgiveness, graduation requirements, or to earn high school credit while in middle school. In order to take classes with OCVS, students must currently attend an Orange County Public School or Home Education Program.

Parent and/or student must inform the school counselor of completed registration. The school counselor will verify information online, ensure that the course requested is appropriate for the student, and electronically approve requested courses. Once the courses have been approved, OCVS will assign the student to an instructor.

Orange County Virtual School is a franchise of Florida Virtual School (FLVS) which means, we use the same curriculum and website to register for classes, but OCVS instructors are all employed by Orange County Public Schools. OCVS has a rolling admission for part-time students.

Directions For Part-Time Students

- Go to vsa.flvs.net to register
- Create an account or Log into existing account
- Select Request New Courses located at the top of the page
- Verify Student Enrollment, Make changes if needed. Click save and continue.
- Select the Browse Course Catalog button to begin Step 2
- Step 2: Browse your Course Catalog
  - Search entire catalog by page
  - Use the search box to narrow the results. (Reset the search tab to go back to the first page of catalog by page.)
  - Use the filter options on the left to refine the search by Education Level and Subject.
  - Choose the course. Click on the orange select button to request the course.
  - Select the Segment (1 for semester 1, 2 for semester 2, or All for full year).
  - Select the small check box to acknowledge the prerequisites for the course have been met, if shown.
  - Choose preferred start date by clicking on calendar.
  
  MAKE SURE TO SELECT ORANGE COUNTY VIRTUAL SCHOOL IN THE DROP BOX MENU

- Select “Continue” at the bottom of the page.
- Complete the survey questions and then select continue
- The student is taken to the Backpack each time a course is selected to confirm the choice.
- Select the “Add More Courses” button to go back into the course catalog to select another course or select the “Continue” button to complete creating an account or if you already have an account you will directed to confirm course requests.
- A progress screen at the top of the page will generate to show the student where they currently are in the registration process.
- Finish Sign-up: Review the courses and the information provided and notify school counselor of online course request for approval.
High School Courses

Core Courses Offered in Honors

- **English**: English 1 through 4, English 4: College Prep, AP English Language, AP English Literature
- **Math**: Algebra 1, Algebra 2, Geometry, Math for College Readiness, Pre-Calculus, AP Calculus AB, AP Calculus BC, AP Statistics
- **Science**: Earth Space Science, Physical Science, Biology, Chemistry, Anatomy and Physiology, Marine Science, Physics, AP Environmental, AP Biology
- **Physical Education**: HOPE
- **Electives**: Parenting Skills*, Peer Counseling*, Driver’s Education*, Personal Fitness*, Outdoor Education*, Fitness Lifestyle Design*, Theatre, Cinema and Film Production, Creative Photography 1, Forensic Science, Leadership Skills Development, Reading for College Success, Intensive Reading, Critical Thinking and Study Skills, AP Art History, Art History and Criticism 1 Honors, Social Media, Peer Counseling 1*, Peer Counseling 2*
- **World Languages**: Spanish 1 and 2, Spanish for Spanish Speakers 1, French 1 and 2
- **Career and Technical**: User Interface Design, Digital Information Technology

* Half Credit Courses
Admission to the State University System of Florida

Admission into Florida’s public universities is competitive. Prospective students should complete a rigorous curriculum in high school and apply to more than one university to increase their chances for acceptance. To qualify to enter one of Florida’s public universities, a first-time-in-college student must meet the following minimum requirements:

High school graduation with a standard diploma

- Admission test scores
- 16 credits of college preparatory academic courses
- 4 English (3 with substantial writing)
- 4 Mathematics (Algebra 1 level and above)
- 3 Natural Science (2 with substantial lab)
- 3 Social Science
- 2 World Language - sequential, in the same language
- 2 approved electives

Additional information is available at flbog.edu/forstudents/planning

In addition to the State University System, the Florida College System includes 28 state colleges. These institutions offer career-related certificates and two-year associate degrees that prepare students to transfer to a bachelor’s degree program or to enter jobs requiring specific skills. Many also offer baccalaureate degrees in high-demand fields. Florida College System institutions have an open door policy. This means that students, who have earned a standard high school diploma, have earned a high school equivalency diploma or have demonstrated success in postsecondary coursework will be admitted to an associate degree program.

Additional information is available at fldoe.org/fcs

Talented Twenty

The Talented Twenty Program is part of the Governor’s Equity in Education Plan. Students eligible for the Talented Twenty Program are guaranteed admission to one of the twelve state universities, and are given priority for award of funds from the Florida Student Assistance Grant (FSAG). The FSAG program is a needs-based grant; therefore, Talented Twenty students must meet FSAG eligibility requirements in order to qualify for priority funding. Please note that while eligible students are guaranteed admission at one of the state universities, they may not be admitted to the campus of choice.

In order to qualify for the Talented Twenty Program, one must:

- Be enrolled in a Florida public high school and graduate with a standard diploma.
- Be ranked in the top 20% of the class after the posting of seventh semester grades.
- Take the ACT or SAT.
- Complete the eighteen college preparatory courses as specified in State Board of Education.

For complete/additional requirements, see Board Rule 6C-6.002 at flbog.edu/documents_meetings/0012_0016_0109_075.pdf
Application for State Universities

High school counselors and College Transition Counselors are prepared to assist students with the application process for state university admissions. To be considered for the Florida State Assistance Grant (FSAG) program, students must file the Free Application for Federal Student Aid (FAFSA) in time to meet the application deadline established by the institution they plan to attend. The FAFSA is available online at fafsa.ed.gov and uses parent and student income information in a formula developed by the United States Congress to calculate the financial contribution families are expected to make toward a student’s post-secondary education.

Student Profile Assessment

The majority of students are admitted on the basis of their past academic achievement and admissions test scores in relation to the minimum requirements. Universities are allowed flexibility to admit a limited number of students as exceptions to the minimum requirements provided that the university determines that the student has potential to be successful in college. Applicants who do not meet minimum requirements may be eligible for admission through a student profile assessment which considers factors such as: family educational background, socioeconomic status, special talents, or the high school or geographic location of the applicant. Any important attributes of special talents should be reported with the application. The factors will not include preferences on the basis of race, national origin, or gender.
Florida Bright Futures Scholarship Program

The Florida Bright Futures Scholarship Act, 1009.531, F. S., established a program consisting of three types of awards: the Florida Academic Scholars Award, the Florida Medallion Scholars Award, and the Florida Gold Seal Vocational Scholars Award. Students seeking a scholarship award to attend a postsecondary institution under the Florida Bright Futures Scholarship program will receive a 0.5 bonus point for grades earned in Advanced Placement, International Baccalaureate, Advanced International Certificate of Education, International General Certificate of Secondary Education, and academic dual enrollment annual courses. Grades received in level 3 annual courses in English, mathematics, science, and social science also receive a 0.5 bonus point. A 0.25 bonus point will be awarded for any of the above courses which are semester courses.

Applications

To apply for a bright futures scholarship, a student must:

- Be a Florida resident and a U.S. citizen or eligible non-citizen, as determined by the student’s postsecondary institution.
- Complete the Florida Financial Aid Application (FFAA) by high school graduation.
- Earn a standard Florida high school diploma or its equivalent.
- Be accepted by, enroll in, and be funded at an eligible Florida public or independent postsecondary education institution within the specified timeframe (2 years or 3 years) from the student’s year of high school graduation. If a student enlists directly into the military after graduation, the 2-year or 3-year period begins on the date the student is separated from active duty.
- Not have been found guilty of, or pled nolo contendere to, a felony charge, unless the student has been granted clemency by the Governor and Cabinet sitting as the Executive Office of Clemency.
- Be enrolled for at least 6 semester credit hours (or the equivalent in quarter or clock hours).
- Submission of a Free Application for Federal Student Aid (FAFSA) is no longer required; however, students are encouraged to submit the FAFSA to learn of potential eligibility for additional state and federal aid.
- Meet the Community Service requirement for the desired award level, as described below.

Community Service Requirements for the Florida Academic Scholars Award (FAS), the Florida Medallion Scholars Award (FMS), and the Gold Seal Vocational Scholars Award (GSV)

All initial applicants must meet the community service requirement, as approved by the school district, or the administration of the private high school, or the Florida Department of Education for home-educated students. No waivers of this requirement can be granted regardless of the method used to qualify (National Merit and Achievement Scholars and Finalists, National Hispanic Scholars, International Baccalaureate Diploma recipients, and AICE Diploma recipients). Community service hours must be completed by high school graduation.

- FAS initial eligibility requirements include the completion of 100 hours of community service
• FMS initial eligibility requirements include the completion of 75 hours of community service
• GSV initial eligibility requirements include the completion of 30 hours of community service

Home-educated students and students who are dependents of military or public service personnel on active duty outside of Florida must provide a letter from the agency or agencies where the community service hours were earned. The documentation must be on agency letterhead and include the number of hours and dates of service completed.

Please note that revisions to the Florida Bright Futures Scholarship Program are subject to change as a result of legislative action.
Career Planning / College Entrance Examinations

In completing their postsecondary education plans, students may find it advisable to complete one or more of the standardized tests listed below which are used for college admissions, career planning, placement in college courses, and/or eligibility for scholarships. Recommended grade levels during which tests should be taken are shown in parenthesis ( ).

1. ACT: American College Testing Program (11, 12)
2. ASVAB: Armed Services Vocational Aptitude Battery (11, 12)
3. PSAT: Preliminary SAT (10, 11)
4. SAT I: Reasoning Test – formerly the Scholastic Assessment Test (11, 12)
5. SAT II: Subject Tests – formerly the Scholastic Assessment Test (11, 12)
6. PERT: Postsecondary Education Readiness Test (11)

Students should see their school counselor for further information about the tests that would be most appropriate for meeting their needs. Some tests require the completion of an online registration form several weeks in advance of the test date.
Career and Technical Education / College Connection

Students completing specific Career Technical Education (CTE) programs can earn post-secondary hours and/or scholarships to enable them to complete post-secondary training. The following options explain how students may maximize their high school CTE course work. For additional information students should contact their Career Specialist or visit orangetechcollege.net.

Career Dual Enrollment at Orange Technical College

Career Dual Enrollment allows the student to take courses through Orange Technical College while still enrolled in high school. Dual enrollment programs prepare students for the workforce and continuing post-secondary education by focusing on technical skills and the attainment of relevant industry certifications. For GPA purposes, dual enrollment grades are weighted the same as Advanced Placement, International Baccalaureate, and Advanced International Certification of Education courses.

Articulation Agreements Postsecondary Credit For CTE Courses

Students completing CTE training courses in the high school may earn credits toward completion of CTE training programs at Orange Technical College. Students completing CTE training programs at Orange Technical College may earn credits toward an Associate of Science degree. Specifically negotiated agreements between the colleges and Orange Technical College allow students to earn college credit for CTE programs successfully completed in high school.

Career Pathways

Career Pathways is a high school transition initiative focusing on higher academics and technical skills. Students are able to link their high school studies with programs at Orange Technical College and/or Valencia College. This can lead to a certificate, associate’s degree or bachelor’s degree.

After taking designated technical courses at their high schools, Career Pathways students participate in a comprehensive assessment and are eligible to receive credit upon enrolling at Orange Technical College or Valencia College. This creates a seamless transition between high school and post-secondary education saving students time and money, as they pursue their post-secondary goals.

Courses eligible for Career Pathways articulated credit are indicated by the CP Career Pathways symbol.
Orange County Public Schools Course Examination Grading Summary

The examination policies below apply to secondary (Grades 6-12) courses as well as CTE courses.

Calculations of student final grades for all courses in Orange County Public Schools fall into one of three categories with different grading rules. Below is a description of these categories of courses and the grading policies that are applied to each.

**Group 1: Courses Associated with Statewide EOC Assessments**
These courses are associated with statewide EOC assessments in Algebra I, Geometry, Algebra II, Biology, US History, and Civics. No additional teacher, school or district semester or final examination may be administered in these courses, and the district calculates a student’s EOC grade from the scale score on the statewide EOC. The grade calculation is as follows:

\[
35\% \text{ Semester 1 Grade} + 35\% \text{ Semester 2 Grade} + 30\% \text{ Statewide EOC Grade} = \text{Student Final Course Grade}
\]

**Group 2: Courses Associated with National and Other Statewide Assessments or Blended Courses**
These courses are associated with national assessments (such as AP and IB assessments) and other statewide assessments (such as FSA grade level assessments and PERT assessments) or blended courses. No additional teacher, school or district semester or final examination may be administered for the course. The grade calculation is as follows:

\[
50\% \text{ Semester 1 Grade} + 50\% \text{ Semester 2 Grade} = \text{Student Final Course Grade}
\]

**Group 3: Courses Associated with Common Final Exams**
These courses are associated with the assessments we refer to as Common Final Exams (CFEs). The CFEs are linked to all courses offered on the OCPS Course Code Directory that do not fall into the other two categories. No additional teacher, school or district semester or final examination may be administered for these courses. There are two grade calculation methods depending on whether or not the course is a full year or semester course.

**FULL YEAR COURSES**

\[
40\% \text{ Semester 1 Grade} + 40\% \text{ Semester 2 Grade} + 20\% \text{ CFE} = \text{Student Final Course Grade}
\]

**SEMESTER COURSES**

\[
40\% \text{ Quarter 1 Grade} + 40\% \text{ Quarter 2 Grade} + 20\% \text{ CFE} = \text{Student Final Course Grade}
\]

For senior high school students the forgiveness policy for required courses is limited to replacing a grade of D or F with a grade of C or higher earned subsequently in the same or comparable course. The forgiveness policy for elective courses is limited to replacing a grade of D or F with a grade of C or higher earned subsequently in another course. In either situation, when a student attempts forgiveness for a grade, only the new grade will be used to compute the student’s GPA. Any course not replaced according to this policy will be included in the calculation of the cumulative grade point average required for graduation. The only exception to the forgiveness policy stated above applies to middle school students who take any high school course. In this case, forgiveness can be applied to courses with a final grade of C, D, or F.
High Schools

Each high school has courses and programs that are unique to that school.

To view each school’s Curriculum Guide, please visit
ocps.net/cs/services/student/guidance/Pages/Curriculum-Guide.aspx
Principal’s Letter

Dear University Cougar,

Welcome to or welcome back to University High School where, “Every Student Is College and Career Ready.” As you continue on your educational journey, deciding on your courses is very important. This guide is an opportunity for you to plan a strong academic foundation for the future. Please use this guide as a tool to:

Focus on Academics – We have created a curriculum with rigor and relevance. We over 20 Advanced Placement (AP) Courses. We offer two high-quality magnet programs: Global Technologies Magnet and the International Baccalaureate (IB) Magnet.

Challenge Yourself - You are capable of completing college-level courses. To be successful, you need two things: 1. Strong curiosity in the subject; 2. Willingness to work hard. In order to prepare for college-level coursework, we encourage you to take Honors and Advanced Placement courses. Also consider career and technical dual enrollment.

Get Involved - We are proud to provide quality programs supporting academia, athletics and the arts. We offer almost 50 academic organizations and extracurricular groups, 42 athletic teams and an award-winning Fine Arts department.

Ask Questions - Review this catalog with your parents and/or guardians and consider your options carefully. If you have any question about the selection process, please contact our Guidance department at 407-482-8745.

High School is an exciting time in your Educational Journey. Please stay focused on your academics. Make wise choices about your courses because they do impact your future. We are here to assist so don’t hesitate to ask. Make it a great Cougar year!

Sincerely,

Anne Carcara, Ed.D
Principal
Guidance Department

Each student will be assigned to one of our counselors based on last name. Please communicate directly with that counselor until the beginning of the school year.

University High School's Guidance Counselors are organized in alpha groups based on student's last name.

Drop / Add Procedures

Please review this guide with your parents/guardians. Planning for next year's classes is an important decision involving numerous factors. Consider teacher recommendations, past performance, and future career goals. Speak with your guidance counselor when making your selections. Counselors will register you for core academic courses based upon your academic history, test scores and teacher recommendations. Elective selection is limited, and may be dictated by assessment scores and student requests. Students will be placed in the most rigorous courses based on their assessment scores starting in middle school. AP courses are scheduled for incoming 9th graders. We understand these courses may be challenging, but with your motivation and proper support, your student will be successful. As you look through this guide, please carefully consider your choices, as movement after selection is limited.

Student Support Programs

SAT and ACT Prep
For college-bound students, this program provides strategies for taking this high-stakes exam. Students will review critical reading and writing and math skills. The schedule is posted each fall.

Tutoring
Tutoring is offered during lunches by the National Honors Society members as well as teachers. Each fall, teachers post their lunch tutoring schedule. After-school tutoring program is available for students from 2:20 to 3:30 after school on Tuesday and Thursday in the media center for mathematics, English and ACT tutoring.

Specialty Elective Programs

INTeam
INTeam stands for Inclusion Network Team and is open to 11th and 12th graders only in good standing. The INTeam member must be a good role model/mentor. INTeam is an elective in which the student is assigned to mentor/tutor an ESE student on a daily basis. The INTeam member attends an assigned academic class each day where he/she may serve several ESE students. Being an INTeam member requires a commitment to help fellow students be successful. INTeam members agree to a minimum of one semester. Teacher supervision and additional documentation is also part of the program. Be a part of a valuable and rewarding team! Be an INTeam Cougar!

Newspaper and Yearbook
Journalism II, III, & IV students are on staff of the school newspaper or yearbook. For yearbook students, Journalism II will include marketing in the areas of sales, publicity, and ad layout design, and Journalism III will include multimedia production and magazine supplement publication. Participation in Journalism II, III, and IV require a full year commitment.

Marine Corps JROTC
The Junior Reserve Officer Training Corps program at University High School is designed to instill patriotism, respect for authority, and develop leadership in all of its members. While it is sponsored by the United States Marine Corps, students do not incur any military obligation to join the armed forces in order to be part of the program. Uniforms are issued free of charge and must be returned upon completion of the course. Two years of successful completion of JROTC fulfill the graduation requirements of HOPE and one Fine Arts credit. Students are required to participate in physical training, maintain military grooming standards, and wear the issued uniform one day per week.

Digital Production
Students in TV Production II and III are the producers of On the Prowl, the morning announcement program. TV II and III allows students to further develop their broadcast journalism skills by producing news packages and Public Service Announcements in addition to the program On the Prowl.
CAPE Academy – Veterinary Assisting  
(Career and Professional Education)

Career and Technical programs provide hands on learning for students - here at UHS we offer Veterinary Assisting. Students can take Vet I, II, III and IV. The CAPE Academy prepares students for a career in Veterinary Medicine or in a related career in the animal industry. The Florida Board of Education has recently partnered with the Florida Veterinary Medical Association and Animal Care Technologies in providing a CVA (Certified Veterinary Assistant) certification for high school seniors. The Vet III or IV students will work towards requirements to take certification exam and enter the workforce after high school or start college with an excellent foundation to work towards the Veterinary degree. The CVA requires 250 hours of classroom lab/ instruction, 250 hours in a Veterinary Hospital/ volunteer setting and a technical skills task booklet to be completed.

Career and Technical Education – Culinary

This course covers the history of the food service industry and careers in that industry. Also covered are safety in the workplace; employability skills; leadership/teamwork skills; care and use of commercial culinary equipment; basic food science; basic nutrition; and following recipes in food preparation labs.

Academic Program Descriptions

“Every Student College and Career Ready”

College Board: Advanced Placement

The College Board’s Advanced Placement Program enables students to pursue college-level studies while still in high school. Based on their performance on rigorous AP Exams, students can earn college credit, advanced class standing, or both, for college.

Gifted Services

The UHS Gifted Program uses a Consultation Model to service its gifted population due to the high number of students enrolled in Advanced Placement courses and the International Baccalaureate program. This model includes monitoring student achievement and target interventions when needed.

Global Technology Magnet

The Global Technology magnet is an AP intensive program geared towards preparing students for high education while providing exposure to several technology-based industries such as: Modeling and Simulation, Engineering, Robotics, Electronic Arts, and Computer Science.

Students interested in participating must apply through the Office of School Choice. Applicant’s schedule must be able to accommodate magnet classes; and have and maintain a 3.0 GPA.
High School /High Tech

HS/HT is designed to provide students with the opportunity to explore post-secondary education and job exploration leading to technology-related careers in the 21st century. It is open to juniors and seniors with a current IEP on file. Topics covered in this course include character building, leadership skills, team building, goal-setting, and many more.

While providing career exploration, students develop leadership and self-esteem through course work, leadership camp, college tours, corporate site visits, job shadowing, guest speakers, service learning and designing, developing, and implementing community service projects.

International Baccalaureate Magnet

The International Baccalaureate Program at University High School includes the 9th and 10th grade Pre-IB Program and the 11th and 12th grade IB Diploma Program.

The IB offers a variety of liberal arts courses that appeal to both the humanities and science-oriented student. While the strong academic program prepares IB students for challenging college classes, students may also earn college credit in advance, depending on the scores they receive on their IB assessments.

Students interested in participating must apply through the Office of School Choice. Applicant’s schedule must accommodate the pre-IB and IB classes; and have and maintain the required GPA.
Art - Visual Arts

0102300  Ceramics/Pottery 1
Length: FY  Credits: 1.0  Area: PF

Students explore how space, mass, balance, and form combine to create aesthetic forms or utilitarian products and structures. Instructional focus will be on ceramics and/or pottery. Media may include, but are not limited to, clay and/or plaster, with consideration of the workability, durability, cost, and toxicity of the media used. Student artists consider the relationship of scale (i.e., hand-held, human, monumental) through the use of positive and negative space or voids, volume, visual weight, and gravity to create low/high relief or freestanding structures for personal intentions or public places. They explore sharp and diminishing detail, size, position, overlapping, visual pattern, texture, implied line, space, and plasticity, reflecting craftsmanship and quality in the surface and structural qualities of the completed art forms. Students in the ceramics and/or pottery art studio focus on use of safety procedures for process, media, and techniques. Student artists use an art criticism process to evaluate, explain, and measure artistic growth in personal or group works. This course incorporates hands-on activities and consumption of art materials.

0102310  Ceramics/Pottery 2
Length: FY  Credits: 1.0  Area: PF

Students explore spatial relationships through the use of nonobjective, abstract, or representational forms, products, or structures. Instructional focus should be on ceramics and/or pottery. Processes and techniques for substitution may include, but are not limited to, wheel-thrown clay, glaze formulation and application. Media may include, but are not limited to, clay and/or plaster with consideration of the workability, durability, cost, and toxicity of the media used. Ceramic and/or pottery artists experiment with and manipulate space-producing devices, including overlapping, transparency, interpenetration, vertical and horizontal axis, inclined planes, disproportionate scale, fractional or abstracted representation, and spatial properties of the structural art elements. Craftsmanship and quality are reflected in the surface and structural qualities of the completed art forms. Students in the ceramics and/or pottery art studio focus on use of safety procedures for process, media, and techniques. Student artists use an art criticism process to evaluate, explain, and measure artistic growth in personal or group works. This course incorporates hands-on activities and consumption of art materials.

0102320  Ceramics/Pottery 3 Honors
Length: FY  Credits: 1.0  Area: PF

Students communicate a sense of 4-D, motion, and/or time, based on creative use of spatial relationships and innovative treatment of space and its components. Instruction may include content in ceramics, pottery, or other related media. Students address 4-D, the inter-relatedness of art and context, and may also include installation or collaborative works, virtual realities, light as a medium (i.e., natural, artificial, or reflective), or flexible, entered, or activated space. Other concepts for exploration include tension, compression or expansion, intrusions or extrusions, grouping, proximity, containment, closure, contradiction, and continuity. Ceramic and/or pottery artists experiment with processes, techniques, and media, which may include, but are not limited to, casting and kiln-firing techniques, and mold making. Craftsmanship and quality are reflected in the surface and structural qualities of the completed art forms. Students in the ceramics and/or pottery art studio focus on use of safety procedures for process, media, and techniques. Student artists use an art criticism process to evaluate, explain, and measure artistic growth in personal or group works. This course incorporates hands-on activities and consumption of art materials.
Courses Offered at University High School

0104300 Advanced Placement Studio Art Drawing
Length: FY Credits: 10 Area: PF
The AP Program offers three studio art courses and portfolios: Two-Dimensional Design, Three-Dimensional Design, and Drawing. The AP Studio Art portfolios are designed for students who are seriously interested in the practical experience of art. Students submit portfolios for evaluation at the end of the school year. The AP Studio Art Program consists of three portfolios — 2-D Design, 3-D Design and Drawing — corresponding to the most common college foundation courses. Students may choose to submit any or all of the Drawing, Two-Dimensional Design, or Three-Dimensional design portfolios. AP Studio Art students create a portfolio of work to demonstrate the artistic skills and ideas they have developed, refined, and applied over the course of the year to produce visual compositions.

0104340 Drawing 1
Length: FY Credits: 10 Area: PF
Students experiment with the media and techniques used to create a variety of two-dimensional (2-D) artworks through the development of skills in drawing. Students practice, sketch, and manipulate the structural elements of art to improve mark making and/or the organizational principles of design in a composition from observation, research, and/or imagination. Through the critique process, students evaluate and respond to their own work and that of their peers. This course incorporates hands-on activities and consumption of art materials.

0104350 Drawing 2
Length: FY Credits: 10 Area: PF
Students develop and refine technical skills and create 2-D compositions with a variety of media in drawing. Student artists sketch, manipulate, and refine the structural elements of art to improve mark-making and/or the organizational principles of design in a composition from observation, research, and/or imagination. Through the critique process, students evaluate and respond to their own work and that of their peers. This course incorporates hands-on activities and consumption of art materials.

0104360 Drawing 3 Honors
Length: FY Credits: 10 Area: PF
Students demonstrate proficiency in the conceptual development of content in drawing to create self-directed or collaborative 2-D artwork suitable for inclusion in a portfolio. Students produce works that show evidence of developing craftsmanship and quality in the composition. Through the critique process, students evaluate and respond to their own work and that of their peers. Through a focused investigation of traditional techniques, historical and cultural models, and individual expressive goals, students begin to develop a personal art style. This course incorporates hands-on activities and consumption of art materials.

0104370 Painting 1
Length: FY Credits: 10 Area: PF
Students experiment with the media and techniques used to create a variety of two-dimensional (2-D) artworks through the development of skills in painting. Students practice, and manipulate the structural elements of art to improve mark making and/or the organizational principles of design in a composition from observation, research, and/or imagination. Through the critique process, students evaluate and respond to their own work and that of their peers. This course incorporates hands-on activities and consumption of art materials.
0104380  Painting 2
Length: FY  Credits: 1.0  Area: PF
Students develop and refine technical skills and create 2-D compositions in painting. Student artists manipulate, and refine the structural elements of art to improve mark-making and/or the organizational principles of design in a composition from observation, research, and/or imagination. Through the critique process, students evaluate and respond to their own work and that of their peers. This course incorporates hands-on activities and consumption of art materials.

0108310  Creative Photography 1
Length: FY  Credits: 1.0  Area: PF
Students explore the aesthetic foundations of art making using beginning photography techniques. This course may include, but is not limited to, color and/or black and white photography via digital media and/or traditional photography. Students become familiar with the basic mechanics of a camera, including lens and shutter operation, compositional foundations, printing an image for display, and evaluating a successful print. Student photographers may use a variety of media and materials, such as 35mm black and white film, single lens reflex camera, digital camera, darkroom, computer application, filters, various papers, digital output, photogram, cyanotypes, Sabatier effect, and pinhole photography. Craftsmanship and quality are reflected in the surface of the prints and the care of the materials. Photographers use an art criticism process to evaluate, explain, and measure artistic growth in personal or group works. This course incorporates hands-on activities and consumption of art materials.

0108320  Creative Photography 2
Length: FY  Credits: 1.0  Area: PF
Students experiment with a variety of photographic media and techniques, and make connections with historical and contemporary photographers to develop a focused body of work. This course may include, but is not limited to, researching the history of photography, making connections to contemporary and community photographers, critiquing with varied techniques, and experimenting with a variety of photographic media. Processes and techniques include, but are not limited to, handcrafted pinhole cameras, hand-tinted photographs, mixed media, cyanotypes, medium format, photo collage, cross-processing, creative filters, infrared and slide film, night photography, macro, panoramic, and/or digital output via a variety of media. Craftsmanship and quality are reflected in the surface of the prints, care of the materials, attention to compositional conventions, and expression of ideas and feelings. Photographers use an art criticism process to evaluate, explain, and measure artistic growth in personal or group works. This course incorporates hands-on activities and consumption of art materials.

0109350  Advanced Placement Studio Art Two-Dimensional Design
Length: FY  Credits: 1.0  Area: PF
The AP Program offers three studio art courses and portfolios: Two-Dimensional Design, Three-Dimensional Design, and Drawing. The AP Studio Art portfolios are designed for students who are seriously interested in the practical experience of art. Students submit portfolios for evaluation at the end of the school year. The AP Studio Art Program consists of three portfolios — 2-D Design, 3-D Design and Drawing — corresponding to the most common college foundation courses. Students may choose to submit any or all of the Drawing, Two-Dimensional Design, or Three-Dimensional design portfolios. AP Studio Art students create a portfolio of work to demonstrate the artistic skills and ideas they have developed, refined, and applied over the course of the year to produce visual compositions.
## Career and Technical Education

### Agriscience Foundations 1/ Level 3
- **Course Code:** 8106810
- **Length:** FY
- **Credits:** 10
- **Area:** EQ

This course is designed to develop competencies in the areas of agricultural history and the global impact of agriculture; career opportunities; scientific and research concepts; biological and physical science principles; environmental principles; agriscience safety; principles of leadership; and agribusiness, employability, and human relations skills in agriscience. Laboratory-based activities are an integral part of this course. These include the safe use and application of appropriate technology, scientific testing and observation equipment.

### Veterinary Assisting 1/ Level 3
- **Course Code:** 8111510
- **Length:** FY
- **Credits:** 10
- **Area:** VO

This course is designed to develop competencies in areas such as the history of the animal industry; applied scientific and technological concepts; safety; terminology; careers; breed identification; animal care and human relations skills.

### Veterinary Assisting 4/ Level 3
- **Course Code:** 8111520
- **Length:** FY
- **Credits:** 10
- **Area:** VO

This course is designed to develop competencies in the areas of animal welfare and rights; research; record keeping; disease and parasites.

### Veterinary Assisting 2/ Level 3
- **Course Code:** 8111540
- **Length:** FY
- **Credits:** 10
- **Area:** VO

This course is designed to develop competencies in the areas such as basic first aid; scientific and technological; tools and equipment; breed identification; and functions of systems.

### Veterinary Assisting 3/ Level 3
- **Course Code:** 8111550
- **Length:** FY
- **Credits:** 10
- **Area:** VO

This course is designed to develop competencies in the areas animal digestive systems; animal breeding; animal control; animal overpopulation; animal related laws; and breeds.

### Agricultural Communications 2/ Level 2
- **Course Code:** 8117010
- **Length:** FY

This course is designed to develop competencies in the communications sector of the agricultural industry including instruction in developing and editing materials for printed media and media broadcast, utilizing photography and graphics, the importance of the internet in communications, writing technical papers and media scripts and ethical and professional issues in the industry.
This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

This course is designed to develop basic entry-level skills required for careers in the digital publishing industry. The content includes computer skills; digital publishing concepts and operations; layout, design, measurement activities; and digital imaging as well as communication, collaboration and decision-making activities; critical thinking; and problem solving. After successful completion of Digital Design 1 students will have met occupational completion point - B, Production Assistant - SOC Code 43-9031.

The purpose of this course is to provide students with the opportunity to gain practical, first-hand knowledge in broad occupational clusters or industry sectors through a structured internship experience. This internship is designed to give students an opportunity to integrate occupational and applied academic learning and to apply knowledge and skills learned in a classroom to actual work situations not generally available through paid employment.

This course is designed to enable each student to demonstrate employability skills; environmental, health, and safety skills; professional, legal, and ethical responsibilities; financial skills; leadership skills; communication skills; human resources and labor skills; America's economic principles; entrepreneurship principles; relate planning methods to life and career goals; and use of industry/technology principles in the workplace. A first occupational completion point will be met upon completion of DCT Principles and one credit of DCT OJT - Data Codes: A through P (see Major Concepts/Content section for list).

The purpose of this course is to provide students with learning opportunities in a prescribed program of study within the Health Science cluster that will enhance opportunities for employment in the career field chosen by the student.

This course is the third course in the Fashion Design Services program. It is designed to further develop competencies in the area of fashion design services. It includes researching history and culture’s effect on design, sketching and free hand drawing, use of technology in the fashion industry, clothing needs for special populations, and creation of an original pattern.
Courses Offered at University High School

8506430  Fashion Design Specialist/Level 3
Length: FY  Credits: 10  Area: PA

8600520  Principles of Engineering/Level 3
Length: FY  Credits: 10  Area: PA
This course helps students understand the field of engineering/engineering technology and prepares them for postsecondary engineering programs by developing a more in-depth mastery of the required knowledge and skills in mathematics, science, and technology. Through problem-based learning strategies, students study key engineering topics, including mechanisms, energy sources, energy applications, machine control, fluid power, statics, material properties, material testing, statistics, and kinematics. Exploring various technology systems and manufacturing processes help students learn how engineers and technicians use math, science and technology in an engineering problem solving process to benefit people. The course also includes concerns about social and political consequences of technological change.

8600530  Digital Electronics/Level 3
Length: FY  Credits: 10  Area: PA
This is a course in applied logic that encompasses the application of electronic circuits and devices. Students are exposed to the design process of combinational and sequential logic design, teamwork, communication methods, engineering standards, and technical documentation. Computer simulation software is used to design and test digital circuitry prior to the actual construction of circuits and devices.

8600550  Introduction to Engineering Design/Level 3
Length: FY  Credits: 10  Area: PA
This course exposes students to the design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation. Students will employ engineering and scientific concepts in the solution of engineering design problems. In addition, they will learn to use 3D solid modeling design software to design solutions to problems. Students will develop problem-solving skills and apply their knowledge of research and design to create solutions, document the process, and communicate the results.

8700100  Architecture and Construction Education Directed Study
Length: Multiple  Credits: Multiple  Area: VO
The purpose of this course is to provide students with learning opportunities in a prescribed program of study within the Architecture and Construction cluster that will enhance opportunities for employment in the career field chosen by the student.

8757210  Grooming and Salon Services Core 1/Level 2
Length: SEM  Credits: 0.5  Area: PA
This course is designed to provide instruction in school, classroom/laboratory safety rules and procedures. It is also designed to provide the student with an opportunity to become familiar with competencies in employability, communication, math and science skills required to succeed in industry. Additionally, it is designed to provide the student with an overview of competencies in State Board of Cosmetology requirements and in the study of the cosmetology law and rules and regulations. He/she will briefly review entrepreneurship competency.
Courses Offered at University High School

8757410  Facials Specialty 2/ Level 2
Length: SEM  Credits: 0.5  Area: VO
This course is designed to provide instruction in competencies in facials and massage.

8757420  Facials Specialty 3/ Level 2
Length: FY  Credits: 1.0  Area: VO
This course is designed to provide competencies in facial make-up, hair removal, artificial lash application and instruction in the selection of proper supplies and implements to perform this service.

8772410  Digital Video Production 1/ Level 3
Length: FY  Credits: 1.0  Area: PA
This course covers competencies in safe work practices, planning a production set, lighting planning, camera operation, and audio/video recording, mixing, and editing.

8772420  Digital Video Production 2/ Level 3
Length: FY  Credits: 1.0  Area: PA
This course covers competencies in safe work practices, planning a production set, lighting planning, camera operation, and audio/video recording, mixing, and editing.

8772430  Digital Video Production 3/ Level 3
Length: FY  Credits: 1.0  Area: PA
This course covers competencies in safe work practices and lighting.

8901000  Human Services Directed Study
Length: Multiple  Credits: Multiple  Area: VO
The purpose of this course is to provide students with learning opportunities in a prescribed program of study within the Human Services cluster(s) that will enhance opportunities for employment in the career field chosen by the student.

9501000  Transportation, Distribution and Logistics Directed Study
Length: Multiple  Credits: Multiple  Area: VO
The purpose of this course is to provide students with learning opportunities in a prescribed program of study within the Transportation, Distribution and Logistics cluster(s) that will enhance opportunities for employment in the career field chosen by the student.
0200335  Advanced Placement Computer Science Principles

Length: FY  Credits: 10

AP Computer Science Principles (AP CSP) introduces students to the foundational concepts of computer science and challenges them to explore how computing and technology can impact the world. With a unique focus on creative problem solving and real-world applications, AP CSP prepares students for college and career.
## Courses Offered at University High School

### Drama - Theatre Arts

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>0400310</td>
<td>Theatre 1</td>
<td>This course is designed for students with little or no theatre experience, and promotes enjoyment and appreciation for all aspects of theatre. Classwork focuses on the exploration of theatre literature, performance, historical and cultural connections, and technical requirements. Improvisation, creative dramatics, and beginning scene work are used to introduce students to acting and character development. Incorporation of other art forms in theatre also helps students gain appreciation for other art forms, such as music, dance, and visual art.</td>
</tr>
<tr>
<td>0400320</td>
<td>Theatre 2</td>
<td>This course is designed for students with a year of experience or more, and promotes enjoyment and appreciation for all aspects of theatre through opportunities to build significantly on existing skills. Classwork focuses on characterization, playwriting, and playwrights' contributions to theatre; while improvisation, creative dramatics, and scene work are used to help students challenge and strengthen their acting skills and explore the technical aspect of scene work.</td>
</tr>
<tr>
<td>0400330</td>
<td>Theatre 3 Honors</td>
<td>This course is designed for students with significant experience in theatre, and promotes depth of engagement and lifelong appreciation for theatre through a broad spectrum of teacher-assigned and self-directed study and performance. Students regularly reflect on aesthetics and issues related to and addressed through theatre, and create within various aspects of theatre in ways that are progressively more innovative. In keeping with the rigor expected in an accelerated setting, students assemble a portfolio that showcases a significant body of work representing personal vision and artistic growth over time; mastery of theatre skills and techniques in one or more areas; and evidence of significant oral and written analytical and problem-solving skills based on their structural, historical, and cultural knowledge.</td>
</tr>
<tr>
<td>0400340</td>
<td>Theatre 4 Honors</td>
<td>This course is designed for students with extensive experience in theatre, and promotes significant depth of engagement and lifelong appreciation for theatre through a broad spectrum of primarily self-directed study and performance. In keeping with the rigor expected in an accelerated setting, students assemble a portfolio that showcases a significant body of work representing personal vision and artistic growth over time; mastery of theatre skills and techniques in one or more areas; and evidence of sophisticated oral and written analytical and problem-solving skills based on their structural, historical, and cultural knowledge.</td>

Courses Offered at University High School

0400410  Technical Theatre: Design & Production 1

Length: FY  Credits: 1.0  Area: PF

Students focus on developing the basic tools and procedures for creating elements of technical theatre, including costumes, lighting, makeup, properties (props), publicity, scenery, and sound. Technical knowledge of safety procedures and demonstrated safe operation of theatre equipment, tools, and raw materials are central to success in this course. Students explore and learn to analyze dramatic scripts, seeking production solutions through historical, cultural, and geographic research. Students also learn the basics of standard conventions of design presentation and documentation; the organizational structure of theatre production and creative work in a collaborative environment; and the resulting artistic improvement. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

0400420  Technical Theatre: Design & Production 2

Length: FY  Credits: 1.0  Area: PF

Students focus on the design and safe application of basic tools and procedures to create elements of technical theatre, including costumes, lighting, makeup, properties (props), publicity, scenery, and sound. Students develop assessment and problem-solving skills; the ability to connect selected literature to a variety of cultures, history, and other content areas. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

0400430  Technical Theatre: Design & Production 3

Length: FY  Credits: 1.0  Area: PF

Students regularly reflect on aesthetics and issues related to and addressed through theatre, and create within various aspects of theatre. Student designers and technicians assemble a portfolio that showcases a body of work representing artistic growth over time; growing command of theatre skills and techniques in one or more areas; and evidence of significant oral and written analytical and problem-solving skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

0400440  Technical Theatre: Design & Production 4 Honors

Length: FY  Credits: 1.0  Area: PF

Students regularly reflect on aesthetics and issues related to and addressed through theatre, and create within various aspects of theatre in ways that are progressively more innovative. Students analyze increasingly more sophisticated theatre literature to inform the work of developing technical design and production pieces for one-acts or a larger production. Students assemble a portfolio that showcases an extensive body of work representing personal vision and artistic growth over time. Public performances may serve as a culmination of specific instructional goals. Students may be required to participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

Drama - Theatre Arts
0400810 International Baccalaureate Theatre 1
Length: FY Credits: 10 Area: PF
This course aims to help students understand the nature of the theatre by making it as well as by studying it, and to understand the forms it takes in other cultures. All students must study five compulsory components at HL. They are: Performance skills, World theatre studies, Practical play analysis, Theatre production, Individual project.

0400830 International Baccalaureate Theatre 3
Length: FY Credits: 10 Area: PF
This course aims to help students understand the nature of the theatre by making it as well as by studying it, and to understand the forms it takes in other cultures. All students must study five compulsory components at HL. They are: Performance skills, World theatre studies, Practical play analysis, Theatre production, Individual project.

The purpose of this course is to enable students with disabilities to apply career knowledge and skills to perform work-related behaviors in a paid employment situation.
Experiential Education

0500300 Executive Internship 1
Length: FY Credits: 10
The purpose of this course is to provide a practical introduction to the work environment through direct contact with professionals in the community.

0500310 Executive Internship 2
Length: FY Credits: 10
The purpose of this course is to supplement the existing curriculum by providing community internships. Students apply textbook learning, leadership skills, and understanding in challenging and creative professional areas.
Health Education

0800320 First Aid and Safety
Length: SEM Credits: 0.5
This course provides a basic overview of the causes and preventions of unintentional injuries, appropriate emergency responses to those injuries and crisis response planning. Safety education should include cardiopulmonary resuscitation (CPR) and the use of an automatic external defibrillator (AED), first aid for obstructed airway, and injury prevention.

0800360 Health Explorations Honors
Length: SEM Credits: 0.5
The purpose of this course is for students to apply health-related research practices. Experiences include discourses in major health problems in society, modern health practices, current scientific findings related to human diseases and disorders, collection, analysis and evaluation of health information, health advocacy trends, and health career investigations.
Courses Offered at University High School

Humanities

0900800 International Baccalaureate Theory of Knowledge 1
Length: FY Credits: 1.0
This course explores the relationships among the various disciplines and ensures that students engage in critical reflection and analysis of the knowledge they acquire. It provides a broad introductory overview of the various types of human knowledge, the ways in which knowledge is acquired and communicated, and its reliability and imitations. Successful completion of Theory of Knowledge, together with successful completion of the Extended Essay, earns bonus points added to your Diploma Programme exam marks, and can be very helpful in getting you all the way to your IB diploma and those college credits and scholarship opportunities you are hoping for. This course involves reading and talking about a lot of very interesting stuff not usually addressed in formal course outlines—but very important to success in those classes and in life in general. Perhaps more than any other course in the Diploma Programme, Theory of Knowledge both demands and helps to develop the characteristics described on the IB Learner Profile.

0900810 International Baccalaureate Theory of Knowledge 2
Length: FY Credits: 1.0
This course explores the relationships among the various disciplines and ensures that students engage in critical reflection and analysis of the knowledge they acquire. It provides a broad introductory overview of the various types of human knowledge, the ways in which knowledge is acquired and communicated, and its reliability and imitations. Successful completion of Theory of Knowledge, together with successful completion of the Extended Essay, earns bonus points added to your Diploma Programme exam marks, and can be very helpful in getting you all the way to your IB diploma and those college credits and scholarship opportunities you are hoping for. This course involves reading and talking about a lot of very interesting stuff not usually addressed in formal course outlines—but very important to success in those classes and in life in general. Perhaps more than any other course in the Diploma Programme, Theory of Knowledge both demands and helps to develop the characteristics described on the IB Learner Profile.
JROTC and Military Training

1803300 Marine Corps: Leadership Education 1
Length: FY Credits: 10
The purpose of this course is to enable students to develop a broad range of basic skills and knowledge, with opportunities for total development in leadership. This course further enables students to develop positive attitudes, good citizenship, and patriotism through character-building activities. The Marine Corps JROTC provides military instruction in a learning environment useful to students in a future military or civilian career.

1803310 Marine Corps: Leadership Education 2
Length: FY Credits: 10
The purpose of this course is to enable students to develop a broad range of intermediate level skills and knowledge, with opportunities for total development in leadership. This course enables students to develop positive attitudes, good citizenship, and patriotism through character-building activities. The Marine Corps JROTC provides military instruction in a learning environment useful to students in a future military or civilian career.

1803320 Marine Corps: Leadership Education 3
Length: FY Credits: 10
The purpose of this course is to enable students to develop a broad range of advanced skills and knowledge, with opportunities for total development in leadership. This course further enables students to develop good citizenship, self-discipline, and respect for constituted authority through character-building activities. The Marine Corps JROTC provides military instruction in a learning environment useful to students in a future military or civilian career.

1803330 Marine Corps: Leadership Education 4
Length: FY Credits: 10
The purpose of this course is to enable students to develop a broad range of advanced skills and knowledge, with opportunities for total development in leadership. This course enables students to develop good citizenship, self-discipline, and respect for constituted authority through character-building activities. The Marine Corps JROTC provides military instruction in a learning environment useful to students in a future military or civilian career.
Courses Offered at University High School

Language Arts

**1000410 Intensive Reading**

Length: Multiple  
Credits: Multiple

The purpose of this course is to provide instruction that enables students to accelerate the development of reading and writing skills and to strengthen those skills so they are able to successfully read and write grade level text independently. Instruction emphasizes reading comprehension, writing fluency, and vocabulary study through the use of a variety of literary and informational texts encompassing a broad range of text structures, genres, and levels of complexity. Texts used for instruction focus on a wide range of topics, including content-area information, in order to support students in meeting the knowledge demands of increasingly complex text. Students enrolled in the course will engage in interactive text-based discussion, question generation, and research opportunities. They will write in response to reading and cite evidence when answering text dependent questions orally and in writing. The course provides extensive opportunities for students to collaborate with their peers. Scaffolding is provided as necessary as students engage in reading and writing increasingly complex text and is removed as the reading and writing abilities of students improve over time.

**1001310 English 1**

Length: FY  
Credits: 1.0  
Area: EN

The purpose of this course is to provide English 1 students, using texts of high complexity, integrated language arts study in reading, writing, speaking, listening, and language for college and career preparation and readiness.

**1001320 English Honors 1**

Length: FY  
Credits: 1.0  
Area: EN

The purpose of this course is to provide grade 9 students, using texts of high complexity, advanced integrated language arts study in reading, writing, speaking, listening, and language for college and career preparation and readiness.

**1001340 English 2**

Length: FY  
Credits: 1.0  
Area: EN

The purpose of this course is to provide grade 10 students, using texts of high complexity, integrated language arts study in reading, writing, speaking, listening, and language for college and career preparation and readiness.

**1001350 English Honors 2**

Length: FY  
Credits: 1.0  
Area: EN

The purpose of this course is to provide grade 10 students, using texts of high complexity, advanced integrated language arts study in reading, writing, speaking, listening, and language in preparation for college and career readiness.

**1001370 English 3**

Length: FY  
Credits: 1.0  
Area: EN

The purpose of this course is to provide grade 11 students, using texts of high complexity, integrated language arts study in reading, writing, speaking, listening, and language for college and career preparation and readiness.
1001380  English Honors 3
Length: FY  Credits: 10  Area: EN
The purpose of this course is to provide grade 11 students, using texts of high complexity, advanced integrated language arts study in reading, writing, speaking, listening, and language in preparation for college and career readiness.

1001400  English 4
Length: FY  Credits: 10  Area: EN
The purpose of this course is to provide grade 12 students, using texts of high complexity, integrated language arts study in reading, writing, speaking, listening, and language for college and career preparation and readiness.

1001405  English 4: Florida College Prep
Length: FY  Credits: 10  Area: EN
This course incorporates reading and writing study through writing a variety of informative texts using grade-level writing craft and through the in-depth reading and analysis of informational selections in order to develop critical reading and writing skills necessary for success in college courses. This course prepares students for successful completion of Florida college English courses. The benchmarks reflect the Florida Postsecondary Readiness Competencies necessary for entry-level college courses.

1001410  English Honors 4
Length: FY  Credits: 10  Area: EN
The purpose of this course is to provide grade 12 students, using texts of high complexity, advanced integrated language arts study in reading, writing, speaking, listening, and language for college and career preparation and readiness.

1001420  Advanced Placement English Language and Composition
Length: FY  Credits: 10  Area: EN
The AP English Language and Composition course aligns to an introductory college-level rhetoric and writing curriculum, which requires students to develop evidence-based analytic and argumentative essays that proceed through several stages or drafts. Students evaluate, synthesize, and cite research to support their arguments. Throughout the course, students develop a personal style by making appropriate grammatical choices. Additionally, students read and analyze the rhetorical elements and their effects in non-fiction texts, including graphic images as forms of text, from many disciplines and historical periods.

1001430  Advanced Placement English Literature and Composition
Length: FY  Credits: 10  Area: EN
The AP English Literature and Composition course aligns to an introductory college-level literary analysis course. The course engages students in the close reading and critical analysis of imaginative literature to deepen their understanding of the ways writers use language to provide both meaning and pleasure. As they read, students consider a work’s structure, style, and themes, as well as its use of figurative language, imagery, symbolism, and tone. Writing assignments include expository, analytical, and argumentative essays that require students to analyze and interpret literary works.
Courses Offered at University High School

1001800  Florida's Preinternational Baccalaureate English 1
Length: FY  Credits: 1.0  Area: EN
The purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, a holistic view of knowledge, intercultural awareness, embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

1001810  Florida's Preinternational Baccalaureate English 2
Length: FY  Credits: 1.0  Area: EN
The purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, a holistic view of knowledge, intercultural awareness, embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

1001820  International Baccalaureate English Literature 3
Length: FY  Credits: 1.0  Area: EN
The purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, a holistic view of knowledge, intercultural awareness, embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

1001830  International Baccalaureate English Literature 4
Length: FY  Credits: 1.0  Area: EN
The purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.
1002380  Developmental Language Arts Through ESOL

Length: Multiple  Credits: Multiple

The purpose of this course is to provide students who are native speakers of languages other than English instruction enabling students to accelerate the development of reading, writing, listening, speaking and language skills and to strengthen these skills so they are able to successfully read and comprehend grade level text independently. Instruction emphasizes reading comprehension and vocabulary through the use of a variety of literary and informational texts encompassing a broad range of text structures, genres, and levels of complexity. Texts used for instruction focus on a wide range of topics, including content-area information, in order to support students in meeting the knowledge demands of increasingly complex text.

1002381  Developmental Language Arts ESOL (Reading)

Length: Multiple  Credits: Multiple

The purpose of this course is to provide students who are native speakers of languages other than English instruction enabling students to accelerate the development of reading and writing skills and to strengthen these skills so they are able to successfully read, write, and comprehend grade level text independently. Instruction emphasizes reading comprehension and vocabulary through the use of a variety of literary and informational texts encompassing a broad range of text structures, genres, and levels of complexity. Texts used for instruction focus on a wide range of topics, including content-area information, in order to support students in meeting the knowledge demands of increasingly complex text.

1006300  Journalism 1

Length: FY  Credits: 1.0

The purpose of this course is to enable students to develop fundamental skills in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media.

1006310  Journalism 2

Length: FY  Credits: 1.0

The purpose of this course is to enable students to extend fundamental skills in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop further knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media.

1006331  Journalism 5 Honors

Length: FY  Credits: 1.0

The purpose of this course is to perform advanced skills in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop advanced knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media.
Courses Offered at University High School

1006332  **Journalism 6 Honors**
Length: FY  Credits: 1.0
The purpose of this course is to enable students to perform advanced work in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop advanced knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media. School and professional publication efforts are expected.

1006333  **Journalism 7 Honors**
Length: FY  Credits: 1.0
The purpose of this course is to enable students to perform advanced work in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop extended knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media. School and professional publication efforts are expected.

1006334  **Journalism 8 Honors**
Length: FY  Credits: 1.0
The purpose of this course is to enable students to perform highly advanced work in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop extended knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media. School, community, and professional publication is expected.

1007330  **Debate 1**
Length: FY  Credits: 1.0  Area: PF
The purpose of this course is to develop students' beginning awareness, understanding, and application of language arts as it applies to oral communication concepts and strategies for public debate in a variety of given settings.

1007340  **Debate 2**
Length: FY  Credits: 1.0  Area: PF
The purpose of this course is to continue to develop students' awareness, understanding, and application of language arts as it applies to oral communication concepts and strategies for public debate in a variety of given settings. Some work outside of the regular school day may be required.
Leadership Skills Development

2400300  Leadership Skills Development
Length: FY  Credits: 10
The purpose of this course is to teach leadership skills, parliamentary procedure, problem solving, decision making, communication skills, group dynamics, time and stress management, public speaking, human relations, public relations, team building, and other group processes.

2400310  Leadership Techniques
Length: FY  Credits: 10
This course will provide an in-depth study of the leadership techniques of decision making, problem solving, meeting skills, communication, group conflict reduction, time and stress management, evaluation, team building, group dynamics, motivational strategy, and the role of leadership in a democratic society.

2400320  Leadership Strategies
Length: FY  Credits: 10
The purpose of this course is to provide formative opportunities to build on skills acquired in the Leadership Techniques course, including meetings skills, communication skills, motivational strategies, character development, group dynamics, community relations, community service and personal and civic responsibility.
Mathematics

1200310  Algebra 1
Length: FY  Credits: 10  Area: A1

The fundamental purpose of this course is to formalize and extend the mathematics that students learned in the middle grades. The critical areas, called units, deepen and extend understanding of linear and exponential relationships by contrasting them with each other and by applying linear models to data that exhibit a linear trend, and students engage in methods for analyzing, solving, and using quadratic functions. The Standards for Mathematical Practice apply throughout each course, and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

1200320  Algebra 1 Honors
Length: FY  Credits: 10  Area: A1

The fundamental purpose of this course is to formalize and extend the mathematics that students learned in the middle grades. The critical areas, called units, deepen and extend understanding of linear and exponential relationships by contrasting them with each other and by applying linear models to data that exhibit a linear trend, and students engage in methods for analyzing, solving, and using quadratic functions. The Standards for Mathematical Practice apply throughout each course, and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

1200330  Algebra 2
Length: FY  Credits: 10  Area: MA

Building on their work with linear, quadratic, and exponential functions, students extend their repertoire of functions to include polynomial, rational, and radical functions. Students work closely with the expressions that define the functions, and continue to expand and hone their abilities to model situations and to solve equations, including solving quadratic equations over the set of complex numbers and solving exponential equations using the properties of logarithms. The Standards for Mathematical Practice apply throughout each course, and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

1200340  Algebra 2 Honors
Length: FY  Credits: 10  Area: MA

Building on their work with linear, quadratic, and exponential functions, students extend their repertoire of functions to include polynomial, rational, and radical functions. Students work closely with the expressions that define the functions, and continue to expand and hone their abilities to model situations and to solve equations, including solving quadratic equations over the set of complex numbers and solving exponential equations using the properties of logarithms. The Standards for Mathematical Practice apply throughout each course, and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.
Courses Offered at University High School

**1200700 Mathematics for College Readiness**

Length: FY  
Credits: 1.0  
Area: MA

This course is targeted for students who are not yet “college ready” in mathematics or simply need some additional instruction in content to prepare them for success in college level mathematics. This course incorporates the Florida Standards for Mathematical Practices as well as the following Florida Standards for Mathematical Content: Expressions and Equations, The Number System, Functions, Algebra, Geometry, Number and Quantity, Statistics and Probability, and the Florida Standards for High School Modeling. The standards align with the Mathematics Postsecondary Readiness Competencies deemed necessary for entry-level college courses.

**1202310 Advanced Placement Calculus AB**

Length: FY  
Credits: 1.0  
Area: MA

AP Calculus AB is roughly equivalent to a first semester college calculus course devoted to topics in differential and integral calculus. The AP course covers topics in these areas, including concepts and skills of limits, derivatives, definite integrals, and the Fundamental Theorem of Calculus. The course teaches students to approach calculus concepts and problems when they are represented graphically, numerically, analytically, and verbally, and to make connections amongst these representations. Students learn how to use technology to help solve problems, experiment, interpret results, and support conclusions.

**1202320 Advanced Placement Calculus BC**

Length: FY  
Credits: 1.0  
Area: MA

AP Calculus BC is roughly equivalent to both first and second semester college calculus courses and extends the content learned in AB to different types of equations and introduces the topic of sequences and series. The AP course covers topics in differential and integral calculus, including concepts and skills of limits, derivatives, definite integrals, the Fundamental Theorem of Calculus, and series. The course teaches students to approach calculus concepts and problems when they are represented graphically, numerically, analytically, and verbally, and to make connections amongst these representations. Students learn how to use technology to help solve problems, experiment, interpret results, and support conclusions.

**1202340 Pre-Calculus Honors**

Length: FY  
Credits: 1.0  
Area: MA

The purpose of this course is to enable students to develop concepts and skills in advanced algebra, analytic geometry, and trigonometry.

**1202375 International Baccalaureate Pre-Calculus**

Length: FY  
Credits: 1.0  
Area: MA

This course caters for students who already possess knowledge of basic mathematical concepts, and who are equipped with the skills needed to apply simple mathematical techniques correctly. The majority of these students will expect to need a sound mathematical background as they prepare for future studies in subjects such as chemistry, economics, psychology and business administration.
### International Baccalaureate Calculus and Descriptive Statistics

**Course Code:** 1202810  
**Length:** FY  
**Credits:** 1.0  
**Area:** MA

Calculus IB explores the relationships between variables that are changing and teaches skills that are a basic requirement in Science, Engineering, Accounting, and Business Administration. Material for the IB subsidiary level mathematics examination, including differentiation, integration, related applications, vectors, matrix transformations and probability and statistics are also included. Instruction and assignments in these classes are characterized by acceleration, depth, complexity and novelty and more independence.

### Geometry

**Course Code:** 1206310  
**Length:** FY  
**Credits:** 1.0  
**Area:** GE

The fundamental purpose of the course in Geometry is to formalize and extend students' geometric experiences from the middle grades. Students explore more complex geometric situations and deepen their explanations of geometric relationships, moving towards formal mathematical arguments. Important differences exist between this Geometry course and the historical approach taken in Geometry classes. For example, transformations are emphasized early in this course. Close attention should be paid to the introductory content for the Geometry conceptual category found in the high school standards. The Standards for Mathematical Practice apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

### Geometry Honors

**Course Code:** 1206320  
**Length:** FY  
**Credits:** 1.0  
**Area:** GE

The fundamental purpose of the course in Geometry is to formalize and extend students' geometric experiences from the middle grades. Students explore more complex geometric situations and deepen their explanations of geometric relationships, moving towards formal mathematical arguments. Important differences exist between this Geometry course and the historical approach taken in Geometry classes. For example, transformations are emphasized early in this course. Close attention should be paid to the introductory content for the Geometry conceptual category found in the high school standards. The Standards for Mathematical Practice apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

### Liberal Arts Mathematics 1

**Course Code:** 1207300  
**Length:** FY  
**Credits:** 1.0  
**Area:** MA

### International Baccalaureate Mathematics Studies

**Course Code:** 1209800  
**Length:** FY  
**Credits:** 1.0  
**Area:** MA

The purpose of the course is to give students experience in several topics of mathematics with very practical applications. They will be able to explore how mathematics is relevant in other subjects that they may be studying concurrently. By working through contextual problems, they will learn to think logically, extract relevant information, make conclusions and communicate solutions clearly. Students will be expected to solve problems that lend themselves to a variety of approaches, and multi-stepped solutions. Students will also develop problem solving approaches of their own.
Probability & Statistics with Applications Honors

Length: FY  Credits: 1.0  Area: MA

Probability and Statistics is designed to introduce the methods used in the field of applied statistics. Emphasis is given to basic concepts and techniques for collecting and analyzing data, drawing conclusions, and making predictions. The major focus of this course is to provide students with experience in solving problems which can be set up as mathematical models.

International Baccalaureate Statistics & Introductory Differential

Length: FY  Credits: 1.0  Area: MA

It has an emphasis on applications of mathematics, and the largest section is on statistical techniques. It is designed for students with varied mathematical backgrounds and abilities. It offers students opportunities to learn important concepts and techniques and to gain an understanding of a wide variety of mathematical topics. Students taking this course are well prepared for a career in social sciences, humanities, languages or arts.

Advanced Placement Statistics

Length: FY  Credits: 1.0  Area: MA

Course content includes but not be limited to the following: exploratory data: observing patterns and departures from patterns; planning a study: deciding what and how to measure; anticipating patterns in advance: producing models, using probability and simulation, and statistical inference.

Advanced Topics in Mathematics

Length: FY  Credits: 1.0  Area: MA

A course designed for students who have completed three years of high school mathematics including Algebra 2, and are interested in learning about advanced mathematical topics and improving their math proficiency. The course includes discrete math topics, probability and statistics, and a survey of algebra 2 topics.
Music

1300330  Advanced Placement Music Theory
Length: FY  Credits: 10  Area: PF
The purpose of this course is to develop the student's ability to recognize and understand the basic materials and processes in any music that is heard or read in score.

1300816  International Baccalaureate Music 1
Length: FY  Credits: 10  Area: PF
The Diploma Programme music course provides an appropriate foundation for further study in music at university level or in music career pathways. It also provides an enriching and valuable course of study for students who may pursue other careers. This course also provides all students with the opportunity to engage in the world of music as lifelong participants.

1300820  International Baccalaureate Music 3
Length: FY  Credits: 10  Area: PF
The Diploma Programme music course provides an appropriate foundation for further study in music at university level or in music career pathways. It also provides an enriching and valuable course of study for students who may pursue other careers. This course also provides all students with the opportunity to engage in the world of music as lifelong participants.

1301320  Guitar 1
Length: FY  Credits: 10  Area: PF
Students with little or no experience develop basic guitar skills and knowledge, including simple and full-strum chords, bass lines and lead sheets, barre and power chords, foundational music literacy and theory, major scales, simple finger-picking patterns, and ensemble skills for a variety of music. Beginning guitarists explore the careers and music of significant performers in a variety of styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/ or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

1301360  Keyboard 1
Length: FY  Credits: 10  Area: PF
Students build fundamental piano techniques while learning to read music, acquire and apply knowledge of basic music theory, and explore the role of keyboard music in history and culture. Beginning pianists develop skills in analytical listening and explore musical creativity in the form of basic improvisation and basic composition. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/ or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.
1302310  Band 2
Length: FY  Credits: 10  Area: PF
This year-long, beginning-level class, designed for students with at least one year of woodwind, brass, and/or percussion ensemble experience, promotes the enjoyment and appreciation of music through performance of high-quality wind and percussion literature. Rehearsals focus on the development of critical listening skills, instrumental and ensemble technique and skills, expanded music literacy, and aesthetic awareness culminating in periodic public performances.

1302320  Band 3
Length: FY  Credits: 10  Area: PF
This year-long, formative class, designed for students ready to build on skills and knowledge previously acquired in a middle or high school instrumental ensemble, promotes the enjoyment and appreciation of music through performance of high-quality, intermediate-level wind and percussion literature. Rehearsals focus on development of critical listening/aural skills, individual musicianship, instrumental technique, refinement of ensemble skills, and aesthetic engagement culminating in periodic public performances.

1302330  Band 4
Length: FY  Credits: 10  Area: PF
This year-long, intermediate-level course, designed for students who demonstrate proficiency in woodwind, brass and/or percussion techniques, music literacy, critical listening/aural skills, and ensemble performance skills, promotes greater engagement with and appreciation for music through performance and other experiences with a broad spectrum of music, as well as creativity through composition and/or arranging. Study includes cultivation of well-developed instrumental ensemble techniques and skills, music literacy and theory, and deeper aesthetic engagement with a wide variety of high-quality repertoire.

1302340  Band 5 Honors
Length: FY  Credits: 10  Area: PF
This year-long, advanced course, designed for wind and percussion students with extensive experience in solo performance and larger performing ensembles, promotes significant depth of engagement and lifelong appreciation of music through performance and other experiences with sophisticated instrumental music, as well as creativity through composition and/or arranging. The course includes the development of advanced instrumental ensemble techniques and skills, extended music literacy and theory, and deep aesthetic engagement with a broad spectrum of high-quality repertoire, ranging from early music to the contemporary. Musical independence and leadership are particularly encouraged in this setting.

1302350  Band 6 Honors
Length: FY  Credits: 10  Area: PF
This year-long, highly advanced course, designed for students with substantial experience in solo performance and larger performing ensembles, promotes significant engagement with and appreciation for music through performance of sophisticated wind and percussion literature. Study focuses on mastery of highly advanced music skills, techniques, and processes, as well as creativity through composition and/or arranging and use of current technology to enhance creativity and performance effectiveness. This course also provides significant opportunities for student leadership through peer mentoring, solo work, and participation as a performer or coach in a small or large ensemble.

**Instrumental Techniques 1**

Students in this entry-level class focus on the development of musical and technical skills on a specific instrument through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

**Instrumental Techniques 2**

Students in this novice-level class continue to develop musical and technical skills on a specific instrument through developmentally appropriate solo literature, etudes, scales, and exercises. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

**Instrumental Techniques 3**

Students in this intermediate-level class develop their musical and technical skills further on a specific instrument, and expand their technical and performance skills, enhanced by historical and cultural background knowledge of the music. Students explore more demanding solo literature, etudes, and technical exercises with increasing independence. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

**Instrumental Techniques 4 Honors**

Students in this advanced class refine their musicianship and performance skills on a specified instrument. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.
**Jazz Ensemble 1**

Length: FY  
Credits: 1.0  
Area: PF

Students with experience on an instrument suited for jazz ensemble explore the fundamentals of performance practices, improvisation, and music theory through a diverse repertoire of high-quality jazz literature. Students learn the basics of foundational jazz styles, use chord symbols, develop knowledge of musical structure, and study the history of jazz and its iconic musicians. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

**Jazz Ensemble 2**

Length: FY  
Credits: 1.0  
Area: PF

Students with jazz experience become conversant with basic chord progressions and the scale/chord relationship, strengthen aural skills, and learn to improvise and compose melodies over progressions as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians study jazz history and become familiar with the cultural context of various compositions and artists. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

**Jazz Ensemble 3**

Length: FY  
Credits: 1.0  
Area: PF

Students with considerable jazz experience become conversant with more complex forms and harmonic progressions, and strengthen their aural and improvisational skills as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians apply their theory skills to arranging, transposition, and composing; and study various periods, cultural contexts, compositions, and artists in jazz history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

**Jazz Ensemble 4 Honors**

Length: FY  
Credits: 1.0  
Area: PF

Students with significant jazz experience become highly conversant with complex harmonic structures; compose or arrange for small groups; improvise over various forms, keys, and styles; and are knowledgeable about the professional jazz scene and its icons. Musicians study the impact of technology on jazz and the music industry, and learn the basics of sound reinforcement for solo and ensemble performance. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

<th>Course Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1303300</td>
<td>Chorus 1</td>
<td>This year-long, entry-level class, designed for students with little or no choral experience, promotes the enjoyment and appreciation of music through performance of beginning choral repertoire from a variety of times and places. Rehearsals focus on the development of critical listening skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.</td>
</tr>
<tr>
<td>1303310</td>
<td>Chorus 2</td>
<td>This year-long, beginning-level class, designed for students with one year of experience or less in a choral performing group, promotes the enjoyment and appreciation of music through performance of basic, high-quality choral music. Rehearsals focus on the development of critical listening/aural skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.</td>
</tr>
<tr>
<td>1303320</td>
<td>Chorus 3</td>
<td>This year-long, formative class, designed for students with previous participation in a school chorus who have basic knowledge of note-reading and vocal technique, concentrates on providing students opportunities to strengthen existing skills in critical listening, vocal techniques, and ensemble performance using high-quality three- and four-part choral literature. Rehearsals focus on gaining independence in music literacy and aesthetic engagement through critical listening and thinking skills.</td>
</tr>
<tr>
<td>1303330</td>
<td>Chorus 4</td>
<td>This year-long, intermediate-level class is designed for students with previous participation in a high school chorus and moderate skills in critical listening, vocal techniques, music literacy, and choral performance. Rehearsals focus on enhancing these skills and students' aesthetic engagement with music through a variety of high-quality three- and four-part choral literature, providing students with the means to learn how to reflect and use a combination of analytical, assessment, and problem-solving skills consistently to improve their own and others' performance.</td>
</tr>
<tr>
<td>1303340</td>
<td>Chorus 5 Honors</td>
<td>This year-long, advanced class is designed for students with previous participation in a high school chorus who have demonstrated a capacity for developing advanced listening/aural skills and advanced knowledge of vocal techniques, musical literacy, and choral performance. Chorus V focuses on development and application of these skills and provides opportunities for aesthetic engagement and making individual musical choices, where appropriate, while preparing a variety of high-quality choral literature.</td>

Courses Offered at University High School

**1305300**  **Eurhythmics 1**

Length: FY  
Credits: 1.0  
Area: PF

Student dancers develop basic skills in performing and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Emphasis is placed on dance, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

**1305310**  **Eurhythmics 2**

Length: FY  
Credits: 1.0  
Area: PF

Student dancers build on previous experience to perform and evaluate choreographed performances as an independent ensemble and in cooperation with a music ensemble. Students focus on strengthening dance skills, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

**1305320**  **Eurhythmics 3**

Length: FY  
Credits: 1.0  
Area: PF

Student dancers strengthen their performance and evaluative skills, and explore the basic processes of designing choreography for an independent ensemble or in cooperation with a music ensemble. Students develop more sophisticated dance skills and equipment manipulation. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

**1305330**  **Eurhythmics 4**

Length: FY  
Credits: 1.0  
Area: PF

Student dancers develop advanced skills in creating, performing, and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Coursework focuses on dance, equipment manipulation, precision, and analysis of the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

**1305400**  **Music Ensemble 1**

Length: FY  
Credits: 1.0  
Area: PF

Students with little or no experience in a vocal or instrumental ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.
1305410  Music Ensemble 2
Length: FY  Credits: 1.0  Area: PF
Students with previous vocal or instrumental ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

1305420  Music Ensemble 3
Length: FY  Credits: 1.0  Area: PF
Students strengthen vocal or instrumental ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

1305430  Music Ensemble 4 Honors
Length: FY  Credits: 1.0  Area: PF
Students with extensive vocal or instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expressivity. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.
Peer Counseling

1400340 Peers as Partners in Learning

Length: Multiple

This course is designed to provide reciprocal academic and social benefits to students with disabilities and their peers without disabilities. Students enrolled in this course will learn and apply knowledge and skilled practices in the areas of academic engagement, communication, social barriers, leadership, problem solving, and other disability-related topics such as historical perspectives, inclusion, Universal Design for Learning, person-first language, presumed competence, social justice for minority populations, and media representation of diverse people.
Physical Education

1501310 Fitness Lifestyle Design
Length: SEM  Credits: 0.5  Area: PE
The purpose of this course is to enable students to extend their knowledge of fitness concepts; design, implement, and evaluate a personal fitness program; and develop an individualized level of health-related fitness. Appropriate instructional practices and assessments are used to elicit evidence of student understanding and proficiency of course specific benchmarks related to Cognitive Ability, Movement Competency, Lifetime Fitness, and Responsible Behavior and Values as outlined by the Next Generation Sunshine State Standards for Physical Education and the Common Core State Standards.

1501320 Fitness Issues for Adolescence
Length: SEM  Credits: 0.5  Area: PE
The purpose of this course is to enable students to acquire knowledge of fitness concepts and related adolescent issues and to develop an individualized level of health-related fitness. Appropriate instructional practices and assessments are used to elicit evidence of student understanding and proficiency of course specific benchmarks related to Cognitive Ability, Movement Competency, Lifetime Fitness, and Responsible Behavior and Values as outlined by the Next Generation Sunshine State Standards for Physical Education and the Common Core State Standards.

1501340 Weight Training 1
Length: SEM  Credits: 0.5  Area: PE
The purpose of this course is to develop the physical skills necessary to be competent in many forms of movement as it relates to weight training. The integration of fitness concepts throughout the content is critical to the success of this course.

1501350 Weight Training 2
Length: SEM  Credits: 0.5  Area: PE
Provides students with opportunities to acquire knowledge and skills in weight training including an assessment of muscular strength and endurance as well as a knowledge of health problems associated with inadequate levels of muscular strength, skeletal muscles, sound nutritional practices, and consumer issues related to weight training.

1501360 Weight Training 3
Length: SEM  Credits: 0.5  Area: PE
Provides students with opportunities to acquire knowledge and skills in weight training including an assessment of muscular strength and endurance as well as a knowledge of health problems associated with inadequate levels of muscular strength, skeletal muscles, sound nutritional practices, and consumer issues related to weight training.

The purpose of this course is to develop the physical skills necessary to be competent in many forms of movement, knowledge of team sports concepts such as offensive and defensive strategies and tactics, and appropriate social behaviors within a team or group setting. The integration of fitness concepts throughout the content is critical to the success of this course.

1503400  Aerobics 1
Length: SEM  Credits: 0.5  Area: PE
Provides knowledge and assessment of cardiovascular fitness, knowledge of health problems that are associated with inadequate cardiovascular fitness levels, the value of a fitness program, stress management, and safety practices as they relate to aerobic activities.

1503410  Aerobics 2
Length: SEM  Credits: 0.5  Area: PE
Provides knowledge and assessment of cardiovascular fitness, knowledge of health problems that are associated with inadequate cardiovascular fitness levels, the value of a fitness program, stress management, and safety practices as they relate to aerobic activities.

3026010  HOPE-Physical Education (Core)
Length: FY  Credits: 1.0  Area: PE
The purpose of this course is to develop and enhance healthy behaviors that influence lifestyle choices and student health and fitness. Students will realize the full benefit of this course when it is taught with an integrated approach.
Research and Critical Thinking

1700300  Research 1
Length: FY  Credits: 10
The purpose of this course is to enable students to develop fundamental knowledge of the steps in the research process.

1700310  Research 2
Length: FY  Credits: 10
The purpose of this course is to enable students to develop basic knowledge and skills in the research process with emphasis on determining and refining research questions.
Science

**2000310  Biology 1**
Length: FY  Credits: 10  Area: BI

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

**2000320  Biology 1 Honors**
Length: FY  Credits: 10  Area: BI

While the content focus of this course is consistent with the Biology I course, students will explore these concepts in greater depth. In general, the academic pace and rigor will be greatly increased for honors level course work. Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

**2000340  Advanced Placement Biology**
Length: FY  Credits: 10  Area: BI

The purpose of this course is to provide a study of the facts, principles, and processes of biology and the collection, interpretation, and formulation of hypotheses from available data. Course content follows the outline set forth by the College Board.
2000350  Anatomy and Physiology

Length: FY  Credits: 1.0  Area: EQ

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

2000800  Florida's Preinternational Baccalaureate Biology 1

Length: FY  Credits: 1.0  Area: BI

Course introduces students to the field of Biology. Topics covered include: Cells, The chemistry of life, Genetics, Ecology and evolution, Human health and physiology.

2000810  International Baccalaureate Biology 2

Length: FY  Credits: 1.0  Area: BI

The focus of IB Biology HL is to create citizens of the world who understand universal human values. IB Biology HL is a twoyear course that encompasses the coursework and laboratory experiences that will prepare students for the IB Biology HL examination. The course includes the following core topics: 1) Cells, 2) Chemistry of Life 3) Genetics, 4) Ecology & Evolution, 5) Human Health & Physiology. For Biology HL, additional topics include: Nucleic Acids and Protein, Cell Respiration and Photosynthesis, Human Genetics and Reproduction, Nerve muscles & movement, Excretion, and Plant Science.
2000820  International Baccalaureate Biology 3
Length: FY  Credits: 10  Area: BI

The focus of IB Biology HL is to create citizens of the world who understand universal human values. 2001380  Advanced Placement Environmental Science
Length: FY  Credits: 10  Area: EQ

The AP Environmental Science course is designed to be the equivalent of a one-semester, introductory college course in environmental science, through which students engage with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. The course requires that students identify and analyze natural and human-made environmental problems, evaluate the relative risks associated with these problems, and examine alternative solutions for resolving or preventing them. Environmental Science is interdisciplinary, embracing topics from geology, biology, environmental studies, environmental science, chemistry, and geography.

2002500  Marine Science 1
Length: FY  Credits: 10  Area: EQ

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).
2002510  Marine Science 1 Honors

The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

2003370  Advanced Placement Chemistry

Length: FY  Credits: 1.0  Area: EQ

The AP Chemistry course provides students with a foundation to support future advanced course work in chemistry. Through inquiry-based learning, students develop critical thinking and reasoning skills. Students cultivate their understanding of chemistry and science practices as they explore topics such as: atomic structure, intermolecular forces and bonding, chemical reactions, kinetics, thermodynamics, and equilibrium.
Courses Offered at University High School

2003380  Physics 1
Length: FY  Credits: 1.0  Area: EQ
Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

2003390  Physics 1 Honors
Length: FY  Credits: 1.0  Area: EQ
While the content focus of this course is consistent with the Physics I course, students will explore these concepts in greater depth. In general, the academic pace and rigor will be greatly increased for honors level course work. Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

2003421  Advanced Placement Physics 1
Length: FY  Credits: 1.0  Area: EQ
AP Physics 1 is an algebra-based, introductory college-level physics course that explores topics such as Newtonian mechanics (including rotational motion); work, energy, and power; mechanical waves and sound; and introductory, simple circuits. Through inquiry-based learning, students will develop scientific critical thinking and reasoning skills.

2003422  Advanced Placement Physics 2
Length: FY  Credits: 1.0  Area: EQ
AP Physics 2 is an algebra-based, introductory college-level physics course that explores topics such as fluid statics and dynamics; thermodynamics with kinetic theory; PV diagrams and probability; electrostatics; electrical circuits with capacitors; magnetic fields; electromagnetism; physical and geometric optics; and quantum, atomic, and nuclear physics. Through inquiry-based learning, students will develop scientific critical thinking and reasoning skills.
2003800  Florida's Preinternational Baccalaureate Chemistry 1
Length: FY  Credits: 1.0  Area: EQ
Course introduces students to the theories and practical techniques involved in the composition, characterization, and transformation of substances. As the central science, the chemical principles investigated underpin both the physical world in which we live and all biological systems. Topics covered include: Atomic theory, Bonding, Acids & Bases, Organic Chemistry and Stoichiometry.

2003810  International Baccalaureate Chemistry 2
Length: FY  Credits: 1.0  Area: EQ
Course introduces students to the theories and practical techniques involved in the composition, characterization, and transformation of substances. As the central science, the chemical principles investigated underpin both the physical world in which we live and all biological systems. Topics covered include: Atomic theory, Bonding, Acids & Bases, Organic Chemistry and Stoichiometry.

2003845  International Baccalaureate Physics 2
Length: FY  Credits: 1.0  Area: EQ
Course introduces students to the laws of physics, the experimental skills required in physics, and the social and historical aspects of physics as an evolving body of human knowledge about nature. Topics covered include: Mechanics, Thermodynamics, Waves, Electricity & Magnetism, and Atomic and Nuclear Physics.

2020910  Astronomy Solar/Galactic Honors
Length: FY  Credits: 1.0  Area: EQ
While the content focus of this course is consistent with the Astronomy Solar/Galactic course, students will explore these concepts in greater depth. In general, the academic pace and rigor will be greatly increased for honors level course work. Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).
Social Studies

**2100310 United States History**
Length: FY
Credits: 10
Area: AH

The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

**2100320 United States History Honors**
Length: FY
Credits: 10
Area: AH

The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

**2100330 Advanced Placement United States History**
Length: FY
Credits: 10
Area: AH

Students understand the development of the United States within the context of history by examining connections to the past to prepare for the future as participating members of a democratic society. Students use knowledge pertaining to history, geography, economics, political processes, religion, ethics, diverse cultures and humanities to solve problems in academic, civic, social and employment settings.

**2100800 International Baccalaureate History of the Americas**
Length: FY
Credits: 10
Area: AH

History of the Americas is a course that: Promotes the acquisition and understanding of historical knowledge in breadth and in depth, and across different cultures; Encourages an appreciation and understanding of history as a discipline, including the nature and diversity of its sources, methods and interpretations; Develops in students an international awareness and understanding by promoting the achievement of, empathy with, and understanding of people living in diverse places and at different times; Promotes a better understanding of the present through an understanding of the past; an appreciation of the historical dimension of the human condition; Develops in students an ability to use and communicate historical knowledge and understanding; and a lasting interest in history.
Courses Offered at University High School

2102335  Economics with Financial Literacy
Length: SEM  Credits: 0.5  Area: EC
The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

2102345  Economics with Financial Literacy Honors
Length: SEM  Credits: 0.5  Area: EC
The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

2102370  Advanced Placement Macroeconomics
Length: SEM  Credits: 0.5  Area: EC
AP Microeconomics is an introductory college-level course that focuses on the principles of economics that apply to the functions of individual economic decision-makers. The course also develops students’ familiarity with the operation of product and factor markets, distributions of income, market failure, and the role of government in promoting greater efficiency and equity in the economy. Students learn to use graphs, charts, and data to analyze, describe, and explain economic concepts.

2103400  Advanced Placement Human Geography
Length: FY  Credits: 1.0
The AP Human Geography course is equivalent to an introductory college-level course in human geography. The course introduces students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth’s surface. Students employ spatial concepts and landscape analysis to examine socioeconomic organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and applications. The curriculum reflects the goals of the National Geography Standards (2012).

2106310  United States Government
Length: SEM  Credits: 0.5  Area: AG
The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.
### United States Government Honors

**2106320**  
**Length:** SEM  
**Credits:** 0.5  
**Area:** AG  

The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

### Advanced Placement United States Government and Politics

**2106420**  
**Length:** SEM  
**Credits:** 0.5  
**Area:** AG  

Students acquire a critical perspective of politics and government in the United states. They learn general concepts used to interpret American politics and analyze specific case studies. Students also become familiar with the various institutions, groups, beliefs and ideas that constitute the American political perspective.

### Advanced Placement Psychology

**2107350**  
**Length:** FY  
**Credits:** 1.0  

This course introduces the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students also learn about the ethics and methods psychologists use in their science and practice.

### International Baccalaureate Psychology 1

**2107800**  
**Length:** FY  
**Credits:** 1.0  

This Higher Level course is chosen by some IB students instead of a Group 6 (fine arts) course. The course is divided into four parts: Perspectives on Psychology, including Biological and Learning; Research methodology; Fields within Psychology including, Comparative and Social Psychology, and a student conducted research study.

### International Baccalaureate Psychology 3

**2107820**  
**Length:** FY  
**Credits:** 1.0  

IB psychology examines the interaction of biological, cognitive and sociocultural influences on human behaviour, thereby adopting an integrative approach. Understanding how psychological knowledge is generated, developed and applied enables students to achieve a greater understanding of themselves and appreciate the diversity of human behaviour. The ethical concerns raised by the methodology and application of psychological research are key considerations in IB psychology.

### World History

**2109310**  
**Length:** FY  
**Credits:** 1.0  
**Area:** WH  

The grade 9-12 World History course consists of the following content area strands: World History, Geography and Humanities. This course is a continued in-depth study of the history of civilizations and societies from the middle school course, and includes the history of civilizations and societies of North and South America. Students will be exposed to historical periods leading to the beginning of the 21st Century. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events from ancient and classical civilizations.
**World History Honors**

**2109320**

Length: FY  
Credits: 1.0  
Area: WH

The grade 9-12 World History course consists of the following content area strands: World History, Geography and Humanities. This course is a continued in-depth study of the history of civilizations and societies from the middle school course, and includes the history of civilizations and societies of North and South America. Students will be exposed to historical periods leading to the beginning of the 21st Century. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events from ancient and classical civilizations.

**Advanced Placement World History**

**2109420**

Length: FY  
Credits: 1.0  
Area: WH

The purpose of the AP World History course is to develop greater understanding of the evolution of global processes and contacts, in interaction with different types of human societies. This understanding is advanced through a combination of selective factual knowledge and appropriate analytical skills. The course highlights the nature of changes in international frameworks and their causes and consequences, as well as comparisons among major societies. The course emphasizes relevant factual knowledge deployed in conjunction with leading interpretive issues and types of historical evidence. The course builds on an understanding of cultural, institutional, and technological precedents that, along with geography, set the human stage. Periodization, explicitly discussed, forms an organizing principle for dealing with change and continuity throughout the course. Specific themes provide further organization to the course, along with the consistent attention to contacts among societies that form the core of world history as a field of study.

**International Baccalaureate Contemporary History 2**

**2109805**

Length: FY  
Credits: 1.0

Historical study involves both selection and interpretation of data and critical evaluation of it. Students of history should appreciate the relative nature of historical knowledge and understanding, as each generation reflects its own world and preoccupations and as more evidence emerges. A study of history both requires and develops an individual's understanding of, and empathy for, people living in other periods and contexts.
World Languages

0701320  French 1
Length: FY  Credits: 1.0
French 1 introduces students to the target language and its culture. The student will develop communicative skills in all 3 modes of communication and cross-cultural understanding. Emphasis is placed on proficient communication in the language. An introduction to reading and writing is also included as well as culture, connections, comparisons, and communities.

0701330  French 2
Length: FY  Credits: 1.0
French 2 reinforces the fundamental skills acquired by the students in French 1. The course develops increased listening, speaking, reading, and writing skills as well as cultural awareness. Specific content to be covered is a continuation of listening and oral skills acquired in French 1. Reading and writing receive more emphasis, while oral communication remains the primary objective. The cultural survey of the target language-speaking people is continued.

0701830  International Baccalaureate French 4
Length: FY  Credits: 1.0
French 4 expands the skills acquired by the students in French 3. Specific content includes, but is not limited to, more advanced language structures and idiomatic expressions, with emphasis on conversational skills. There is additional growth in vocabulary for practical purposes including writing. Reading selections are varied and taken from newspapers, magazines, and literary works.

0701840  International Baccalaureate French 5
Length: FY  Credits: 1.0
French 5 expands the skills acquired by students in French 4. Specific content to be covered includes, but is not limited to, developing presentational speaking skills through oral reports on literary and cultural topics, current events, and personal experiences. Reading selections include newspaper and magazine articles, adaptations of short stories and plays, and surveys of target language literature. Interpretive writing is enhanced through compositions using correct language structures.

0702320  German 1
Length: FY  Credits: 1.0
German 1 introduces students to the target language and its culture. The student will develop communicative skills in all 3 modes of communication and cross-cultural understanding. Emphasis is placed on proficient communication in the language. An introduction to reading and writing is also included as well as culture, connections, comparisons, and communities.
0702330  German 2
Length: FY  Credits: 10
German 2 reinforces the fundamental skills acquired by the students in German 1. The course develops increased listening, speaking, reading, and writing skills as well as cultural awareness. Specific content to be covered is a continuation of listening and oral skills acquired in German 1. Reading and writing receive more emphasis, while oral communication remains the primary objective. The cultural survey of the target language-speaking people is continued.

0702340  German 3 Honors
Length: FY  Credits: 10
German 3 provides mastery and expansion of skills acquired by the students in German 2. Specific content includes, but is not limited to, expansions of vocabulary and conversational skills through discussions of selected readings. Contemporary vocabulary stresses activities which are important to the everyday life of the target language-speaking people.

0706800  Florida's Preinternational Baccalaureate Latin 1
Length: FY  Credits: 10
Florida's Pre-IB Latin 1 introduces students to the target language and its culture. The student will develop a thorough understanding of the written language as well as of the influence the language and culture has had on other world languages, culture, government, arts and laws. Emphasis is placed on proficient understanding in the reading of the language. An introduction to writing is also included as well as culture, connections, comparisons, and communities. In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards and Florida Standards for English language arts and mathematics taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, holistic view of knowledge, intercultural awareness embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

0706810  Florida's Preinternational Baccalaureate Latin 2
Length: FY  Credits: 10
Florida's Pre-IB Latin 2 expands the skills acquired by students in Pre-IB Latin 1. Specific content includes, but is not limited to, expansion of vocabulary and translation skills through comprehension of selected readings. Vocabulary and grammar stresses activities which are important to prepare for translating the works of authentic authors in the target language. In presentational speaking and presentational writing, Latin students will present projects and reports of the research they have done about the culture, arts, history, politics, literature and mythology of the target language in English. In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards and Florida Standards for English language arts and mathematics taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, holistic view of knowledge, intercultural awareness embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

**World Languages**

The courses in Classical languages provide opportunities for students to explore the languages, literatures and cultures of ancient Rome and Greece. Latin and Classical Greek are separate courses but they share the same syllabus outline and assessment model. Both can be studied at Standard Level (SL) or Higher Level (HL). Prescribed authors and genre studies for each course are available in the Handbook of procedures for the Diploma Programme and on the OCC.

Spanish 1 introduces students to the target language and its culture. The student will develop communicative skills in all 3 modes of communication and cross-cultural understanding. Emphasis is placed on proficient communication in the language. An introduction to reading and writing is also included as well as culture, connections, comparisons, and communities.

Spanish 2 reinforces the fundamental skills acquired by the students in Spanish 1. The course develops increased listening, speaking, reading, and writing skills as well as cultural awareness. Specific content to be covered is a continuation of listening and oral skills acquired in Spanish 1. Reading and writing receive more emphasis, while oral communication remains the primary objective. The cultural survey of the target language-speaking people is continued.

Spanish 3 provides mastery and expansion of skills acquired by the students in Spanish 2. Specific content includes, but is not limited to, expansions of vocabulary and conversational skills through discussions of selected readings. Contemporary vocabulary stresses activities which are important to the everyday life of the target language-speaking people.

The AP Spanish Language and Culture course emphasizes communication (understanding and being understood by others) by applying interpersonal, interpretive, and presentational skills in real-life situations. This includes vocabulary usage, language control, communication strategies, and cultural awareness. The AP Spanish Language and Culture course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in Spanish.
Advanced Placement Spanish Literature & Culture

Length: FY  
Credits: 10

AP Spanish Literature and Culture course introduces students to the formal study of a representative body of texts from Peninsular Spanish, Latin American, and U.S. Hispanic literature.

Florida's Preinternational Baccalaureate Spanish 1

Length: FY  
Credits: 10

Florida's Pre-IB Spanish 1 introduces students to the target language and its culture. The student will develop communicative skills in all 3 modes of communication and cross-cultural understanding. Emphasis is placed on proficient communication in the language. An introduction to reading and writing is also included as well as culture, connections, comparisons, and communities. In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards and Florida Standards for English language arts and mathematics taught with reference to the unique facets of the IB. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

International Baccalaureate Spanish 3

Length: FY  
Credits: 10

Spanish 3 provides mastery and expansion of skills acquired by the students in Spanish 2. Specific content includes, but is not limited to, expansions of vocabulary and conversational skills through discussions of selected readings. Contemporary vocabulary stresses activities in which are important to the everyday life of the target language-speaking people.
0708830  International Baccalaureate Spanish 4

Length: FY  Credits: 10

Spanish 4 expands the skills acquired by the students in Spanish 3. Specific content includes, but is not limited to, more advanced language structures and idiomatic expressions, with emphasis on conversational skills. There is additional growth in vocabulary for practical purposes including writing. Reading selections are varied and taken from newspapers, magazines, and literary works.

0708840  International Baccalaureate Spanish 5

Length: FY  Credits: 10

Spanish 5 expands the skills acquired by students in Spanish 4. Specific content to be covered includes, but is not limited to, developing presentational speaking skills through oral reports on literary and cultural topics, current events, and personal experiences. Reading selections include newspaper and magazine articles, adaptations of short stories and plays, and surveys of target language literature. Interpretive writing is enhanced through compositions using correct language structures.

0708865  International Baccalaureate Spanish 6

Length: FY  Credits: 10

Spanish 6 expands the skills acquired by students in Spanish 5. Specific content to be covered includes, but is not limited to, developing presentational speaking skills through oral reports on literary and cultural topics, current events, and personal experiences. Reading selections include newspaper and magazine articles, adaptations of short stories and plays, and surveys of target language literature. Interpretive writing is enhanced through compositions using correct language structures.
